The people who make it all happen:

Our Customers

Thank you for choosing us to supply your perennial material. If not for you, we would sadly be working for our competition.

Elton Smith	Owner
Ken & Linda Smith	Production managers, sales
Amy Sieg	Office manager, in-house sales
Matt Gray	Propagation Manager
Jared Knutson	Potting Foreman
Allen Imbody	Delivery Driver & Jack of all Trades
Gianna Bova	Delivery Driver
Michael Meadors	Shipping Coordinator & Plant Maintenance
Adrian Steele	IPM Coordinator
Osaz Omoruyi	IPM Coordinator

Symbol Key:

Native to Ohio or adjacent states including selections and hybrids of plants indigenous thereto.

Attracts brightly colored butterflies

Attracts or feeds animals and/or song birds

Hummingbird nectar source

Deer resistant (we're not claiming deer proof; if they're hungry enough, they'll eat anything)

Good for cut flowers or foliage

Fragrant foliage and/or flowers

Part or all of this plant is poisonous

On the cover:

Left to right, top to bottom: *Heuchera 'Caramel', Allium 'Millenium', Digitalis Foxybee Dark Red, Echinacea 'Sombrero Fuchsia Fandango', Ajuga 'Parrot Paradise', Heuchera 'Grande Carnelian', Dicentra spectabilis, Leucanthemum 'Becky', & Salvia 'April Night'*

New Plants for 2027

These are plants that haven't been listed before. We either trialed a small number of the selection and are confident in our ability to provide a quality product, or we grow a related cultivar and want to give you more choices. We have selected many of these new plants due to your requests. Thank you!

Perennials

Allium 'Ostara'
Anemone tomentosa 'Robustissima'
Astilbe 'Vision in White Delight'
Delosperma 'Rock Crystal Candy Red'
Delosperma 'Rock Crystal Orange'
Delosperma 'Rock Crystal Pink'
Delosperma 'Rock Crystal Purple'
Delosperma 'Rock Crystal Red'
Delosperma 'Rock Crystal Yellow'
Digitalis 'Foxybee Dark Red'
Echinacea 'Fringe Festival'
Echinacea 'Sombrero Fuchsia Fandango'
Echinacea 'Sunmagic Vintage Hot Pink'
Echinacea 'Sunmagic Vintage Hot Red'
Echinacea 'Sunmagic Vintage Ruby'
Echinacea 'Sunmagic Vintage Watermelon'
Erysimum 'Erysistible Fire'
Erysimum 'Erysistble Yellow Pink'
Eupatorium 'Monarch Madness White'
Gaillardia 'Spintop Mango'
Gaura 'Steffi Dark Rose'
Heliopsis 'Red Oriole'
Heuchera 'Eternal Flame'
Heuchera 'Grande Carnelian'
Heuchera 'Iridescent'
Heuchera 'Testarossa'
Hibiscus 'Airbrush Effect'
Hosta 'Dancing in the Moonlight'
Iris germanica 'Breakers'
Iris germanica 'Mariposa Autumn'
Iris germanica 'Neptune's Wine'
Iris germanica 'Sharp Dressed Man'
Iris germanica 'Wintry Sky'
Kniphofia Pyromania 'Orange Blaze'
Kniphofia Pyromania 'Rocket's Red Glare'
Leucanthemum 'Banana Cream II'
Ligularia 'Big Green Tractor'
Ligularia stenocephala 'The Rocket'
Phlox 'Flamingo Fashionably Early'
Phlox paniculata 'Thai Pink Jade'
Salvia 'Caradonna Pink Inspiration'
Salvia 'Noble Princess'
Salvia 'Salute Ice Blue'
Salvia 'Salute Neon Pink'

Allium 'Ostara'

'Rock Crystal Candy Red'

'Rock Crystal Yellow'

'Sunmagic Vintage Hot Red'

'Somb. Fuchsia Fandango'

Heuchera 'Iridescent'

'Caradonna Pink Insperation'

'Salute Ice Blue'

Eupatorium 'Monarch Madness

Erysimum 'Erysistble Yellow Pink'

Iris germanica 'Mariposa Autumn'

Tricyrtis 'Tojen'

Trial Plants for 2027

These are plants we are testing in small numbers, paying close attention to vigor, disease resistance, and performance in the nursery. But most importantly: do the plants do what "they" claim they do. These plants will not be listed in the catalog. If they meet our standards, they will become available for sale and possibly added to our crop schedule for 2028.

Trial Perennials

Acanthus spinosus
Agastache 'Prince's Plume
Ajuga 'Midnight Mystery'
Astilbe 'Bressingham Beauty'
Baptisia 'Golden Anniversary'
Begonia grandis 'Alba'
Campanula 'Cariboo Dark Blue Bicolor'
Coreopsis 'Darling Clementine'
Delosperma 'Desert Dancers Purple'
Delosperma 'Desert Dancers Red'
Dianthus 'Carmen Burgundy'
Dianthus 'Everbloom Raspberry Jam'
Dianthus 'Everlast Red Flash'
Dicentra 'Burning Hearts'
Disporum 'Green Giant'
Echinacea 'Dark Shadows Mystic'
Echinacea 'Delightful Garnet'
Echinacea 'Fine Feathered Flamingo'
Echinacea 'Just Peachy'
Echinacea 'Princess Citrus'
Echinacea 'Revelation Monarch'
Echinacea 'Ruby Giant'
Echinacea 'Sunmagic Cerise'
Echinacea 'Sunmagic Chocolate Cherry'
Echinacea 'Sunmagic Vintage Electric Orange'
Eupatorium purpureum 'Euphoria Ruby'
Gaillardia 'Spintop Mariachi Red Sky'
Geranium 'Frivolius Flashing Pink'
Heliopsis 'Bonfire Sunset'
Heliopsis 'Orange Marble'
Hemerocallis 'Bloomfinity Blushing Bluebell'
Heuchera 'Red Fury'
Heuchera 'Royal Flame'
Heuchera 'Sea Glass'
Hosta 'Bulletproof'
Hyssopus 'Nectar Ninja'
Iris germanica 'Discovered Treasure'
Iris sibirica 'Purplelicious'
Lavandula 'Imperial Gem'
Lavandula 'La Diva Spirit Purple Blue'
Lavandula 'SuperBlue'
Leucanthemum 'Lemon Meringue'
Leucanthemum 'Seventh Heaven'

Terms and Conditions of Sale

Issued January 1st, 2027
This is a wholesale price list only.
This catalog cancels all previous quotations.

DELIVERY:

All delivery of nursery stock is conducted in our vehicles by a member of our staff. Our driver will provide assistance with unloading; however, customers are requested to provide sufficient help to expedite it.

GENERAL DELIVERY SCHEDULE:

Tuesday & Wednesday - Central Ohio; orders should be placed no later than Monday at noon

Thursday - Southwest Ohio (Cincy, Dayton, etc); orders should be placed by Tuesday, 5 pm

Friday - Northern Ohio/Southern Michigan, Indianapolis, and Chicago; orders should be placed by Wednesday, 5pm

FREIGHT CHARGES:

	Distance from SGI	Minimum or Rate Charge	Minimum Invoice
Area 1	0-14 miles	$40.00 or 4.5% of invoice	$500
Area 2	15-59 miles	$55.00 or 5.5% of invoice	$500
Area 3	60-99 miles	$120.00 or 8.5% of invoice	$750
Area 4	100-149 miles	$140.00 or 9% of invoice	$1,000
Area 5	150-249 miles	$190.00 or 9.5% of invoice	$1,000
Area 6	250-449miles	$600.00 or 9.5% of invoice	$3,000

For all other areas please call for a freight quote.

Freight Charges are subject to change without notice based on the fluctuating conditions of the current market.

FUEL SURCHARGE:

For 2027, the fuel surcharge will be re-instated if the EIA Midwest average for diesel fuel rises above $4.30. Our pricing is based on the U.S. Energy Information Administration Index (EIA). We will review this data on a weekly basis.

If re-instated, the fuel surcharge will remain independent from our base rates shown above and will be shown as a separate line item on your invoice. The fuel surcharge amount will be charged on a mileage basis, using the OOIDA fuel surcharge calculator.

We deeply appreciate your understanding and partnership with us in helping to share the dilemma of fuel cost increases. We hope that by sharing this burden together, we can continue to supply you and your customers with the high quality plants and service you've come to expect from Smith's Gardens.

PRODUCT AVAILABILITY:

Plants listed will be available for the 2027 season; however, not all of the plants listed will all be available at all times. Please call ahead or check our website to confirm availability.

GUARANTEE:

We guarantee our plants to be healthy, and to the best of our knowledge, true to name. We will replace or refund the price paid for any plants that prove to be otherwise. It is agreed that the original price paid shall be the maximum damages to which the purchaser is entitled. We will not be held responsible for any other expenses, losses, or inconveniences which the purchaser may sustain as a result thereof. Legal jargon aside, if you are not satisfied with our products, we appreciate knowing just that. Please allow us the opportunity to fix it.

TERMS:

Net 30 days on approved credit. All new accounts are paid in cash or credit card. A 3% service fee is applied to all credit card payments. We will not accept personal checks from new customers until credit is approved. Past due accounts will be assessed a 4% service charge per month.

LOCATION:

We are located at 7520 Home Rd., Delaware, Ohio; west of the Scioto River, between Rt. 745 and Jerome Rd. in southern Delaware County. (See map on page iv) Plan to visit us anytime you are in the area.

HOURS:

March – November

Monday – Friday *8:00 am – 4:30 pm*
Saturday *Closed*

April – July: We are probably working but call ahead to be sure. Arrangements can be made for someone to be there.

Sunday *Closed*

December - February

Closed for the winter but please call if you have any questions. Again, arrangements can be made for someone to be there.

web: www.smithsgardensinc.com
user name: sgi **password**: perennials
Live availability and online ordering also available on OrderEase

Thank you Growing Colors, Terra Nova Nursery, and Walters Gardens for the use of your photographs!

RETAIL PRICING and BAR CODES:

We offer retail pricing of material with or without a bar code and SKU on adhesive labels only, not on pot stakes. Please call for more details. Taking advantage of this service during the winter months can save a lot of time pricing during the season. Let us make your life a little bit easier! There is a $200.00 annual set-up fee for all labels with pricing, UPC, sku's, etc. Any pricing received after March 15th will be subject to a late fee of an additional $100.

LABELS and SIGNAGE:

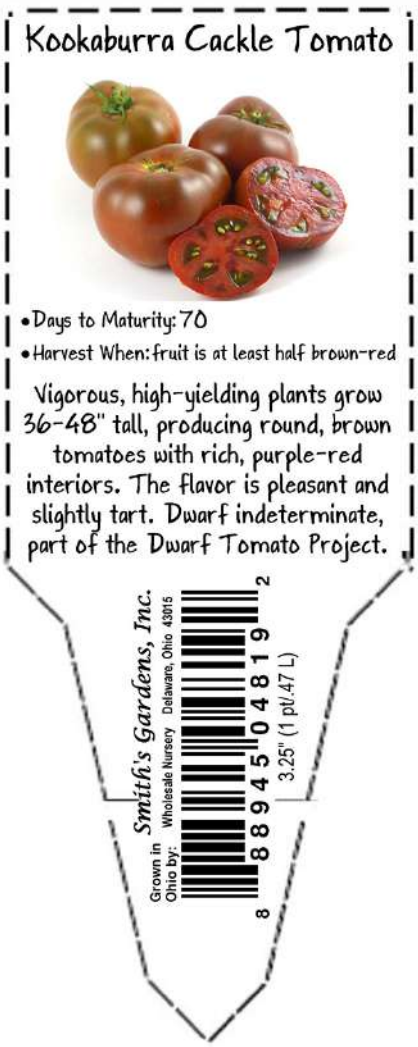

Every quart plant or larger that leaves our nursery receives a full color adhesive label complete with locally specific horticultural data. Because we generate our labels in house, they can include your logo, retail prices, bar codes, SKUs, and much more. Our labels can be quickly modified to accommodate your preferences. If you would like additional labels with your order(s) to use for signage, let us know. They will be provided for free. Labels shown below are actual size.

3.3"x 4" Adhesive Label,
used on 1 gallons and larger

2"x 3.5" Adhesive Label,
used on all Quarts

5.5" x 2.125"
Rigid, waterproof, and fade proof pot stake used on all 3.25" pots. Vegetables will have a color photo, herbs will not. See Edibles catalog for more details.

What's New for 2027

What a busy year it was in 2026, thanks to your patronage. We are grateful for your continued support.

We've been adding more heated greenhouse space this fall in order to deliver better quality products earlier in 2027. But unlike recent year's upgrades to the vegetable and herb production, these greenhouses are earmarked for perennial production. We will now be better able to supply perennials earlier to those of you who prefer them, or "cold" and hardened to those of you who have outdoor display areas.

Delosperma was a surprising hit again in 2026, so we will be offering more of them in 2027. As I write this, the vibrant colors of the Desert Dancers series, Ocean Sunset series, and the Rock Crystal series are brightening up a greenhouse. They are covered and illustrated on pages 21 and 22.

Of course Echinacea continues to be a best seller. The old-fashioned single flowers, like Magnus and Ruby Star, seem to be seeing a renewed popularity. The forms with multiple rows of sterile petals like some of the Sunseeker series are likewise in high demand. We are getting excited about the Sunmagic Vintage series because of their high number of branches, shorter stature, and loads of color. See pages 25-29 for descriptions and photos.

A pleasant surprise in 2026 that we will continue in 2027 was the success of German Iris and their tendency to bloom from a first year bareroot. We will be offering 5 colors, illustrated on page 57.

Another group of perennials we're interested in are showy 2 gallon plants. Many perennial plants will triple the number of blooming stems and the number of flowers per stem in the next size bigger pot, and they make a truly impressive instant impact. Watch for selective offerings throughout the year and see if you agree with their perceived value.

We are excited to have so many of our dedicated staff returning to make the 2027 year better than ever. Our team has worked tirelessly to ensure that we continue to provide you with the high quality products and services you expect from Smith's Gardens, and we are poised to pick up right where we left off in 2026.

Be sure to check out the new and trial plants listed on the previous pages of II and III. There's lots of fun selections coming up!

With so much to look forward to, and all this to get excited about, we are eager to get back out to see all of you. We are grateful for your continued support and loyalty.

Happy Holidays,

..... and in anticipation of Spring,

Ken, Linda, Amy, and the staff at Smith's Gardens

PERENNIALS

Achillea Firefly Collection

Firefly Yarrow

28-30" tall x 24-28" wide Exposure: sun

Bred by Walters Gardens, the Firefly Collection consists of larger plants, with sturdy upright habits. Blooming in early summer, they also re-flower with dead-heading. Part of the Proven Winner program. Achillea is native to Europe and Asia and was originally introduced to America in colonial times and has since naturalized throughout the U.S.

'Firefly Fuschia' - deep fuchsia pink flowers age to light pink, mature and new flowers create a blend of colors on one plant
ppaf

'Firefly Peach Sky' - light peachy orange flowers age to yellow. Mature and new flowers create a blend of colors on one plant
pp# 32,404

'Firefly Red Pop' - bright cherry red flowers have small yellow eyes above silvery green foliage
pp# 36,061

'Firefly Sunshine' - bright yellow flowers contrast with dark gray green foliage
pp# 25,750

PW True 1 gallon

Achillea 'Firefly Fuchsia'

'Firefly Peach Sky'

'Firefly Red Pop'

Achillea 'Firefly Sunshine'

Achillea 'Moonshine'

Moonshine Yarrow

12-24" tall x 12" wide Exposure: full sun

Moonshine Yarrow has stood the test of time and is still sought after for its bright canary yellow flowers and disease-free gray-green foliage. The flat topped flowers are held above the foliage, attracting butterflies. Plants will re-flower if dead-headed. They will perform best in full sun with poor to average soil and low to average water. Achillea is native to Europe and Asia and was originally introduced to America in colonial times and has since naturalized throughout the U.S. Also an excellent dried flower.

True 1 gallon

Achillea 'Moonshine'

Achillea millefolium New Vintage Red ('Balvinred')

pp# 25,618

New Vintage Red Yarrow

12-14" tall x 10-12" wide Exposure: full sun

New Vintage Red produces clusters of true red flowers with creamy white eyes, blooming from June into August. It will perform well in almost any soil with good drainage. If plants begin to look scraggly, trim back hard after the first blooms fade to regrow and rebloom.

True 1 gallon

Achillea New Vintage Red

Achillea New Vintage Violet

Achillea New Vintage Violet ('Balvinolet')

pp# 31,364 — New Vintage Violet Yarrow

12-14" tall x 12" wide — Exposure: sun

Bred by Darwin Perennials, New Vintage Violet is a tidy, compact plant with no gap between the foliage and flowers. Blooming in early summer, it also re-flowers very well with dead-heading. Achillea is native to Europe and Asia and was originally introduced to America in colonial times and has since naturalized throughout the U.S.

True 1 gallon

'Sassy Summer Sangria'

'Sassy Summer Lemon'

Achillea Sassy Summer Collection

Sassy Summer Yarrow

26-32" tall by 22-26" wide — Exposure: sun

Bred and introduced by Walters Gardens, the Sassy Summer series consists of taller plants, with sturdy upright habits. Blooming in early summer, they also re-flower with dead-heading.

'Sassy Summer Lemon' - bright, sunny yellow blooms
pp# 31,693

'Sassy Summer Sangria' - dark red flowers with a tiny white eye mature to rose-pink
pp# 31,355

True 1 gallon

Achillea 'Saucy Seduction'

Achillea millefolium 'Saucy Seduction'

pp# 20,782 — Saucy Seduction Yarrow

24-30" tall by 24" wide — Exposure: full sun

Saucy Seduction is a mid-sized plant with rich green foliage and a dense, upright habit. Clusters of rich pink flowers, each with a tiny white eye, form above the foliage in abundance from June into August. Deadheading will enhance appearance and encourage more buds to form. Site in full sun and moist, well-drained soil for best growth. From Blooms of Bressingham®

True 1 gallon

Aconitum 'Arendsii'

Aconitum carmichaelii 'Arendsii'

Autumn-flowering Monkshood

24-36" tall x 12-18" wide — Exposure: sun

This hybrid monkshood features dense panicles of hooded, deep azure blue flowers in the fall. Rigid stems are covered in glossy, plastic looking leaves that look great all season. Arendsii stems are unusually thick and do not need support. Flowering in September, they combine well with fall blooming Anemones. All parts of this plant are poisonous. We plant 2 crowns per pot.

True 1 gallon & 2 gallon

Agastache Beelicious Pink ('Agapk')

pp# 35,957

16-32" tall & wide Exposure: full sun

Beelicious Pink Hyssop

Beelicious Pink is about twice the size as its counterpart, Beelicious Purple. It has fragrant green foliage with exceptionally large pink flower spikes that darken to rose-pink in fall. It freely reblooms all summer long, so there's less need to deadhead. Hardy to zone 6b.

True 1 gallon

Agastache Beelicious Pink

Agastache 'Blue Fortune'

Height: 24-36" Exposure: full sun

Blue Fortune Hyssop

Blue Fortune is a pollinator magnet! Lavender blue flower spikes cover the plant from mid-summer to early fall. Bred and selected by Gert Fortgens of the Arboretum Trompenberg, in Rotterdam. Blue Fortune is a hybrid of species native to the US and Korea, A. foeniculum x A. rugosa.

True 1 gallon

Agastache 'Blue Fortune'

Agastache 'Purple Haze'

36" tall x 24" wide Exposure: full sun

Purple Haze Hyssop

Purple Haze is a shrubby looking Agastache with shiny green, licorice-scented foliage that produces long spikes of smoky violet-blue flowers from early summer until September. Flowers appear a darker blue than A. 'Blue Fortune' due to the black calyxes. The leaf petioles and stems will pick up a purple color with cooler fall temperatures. The stems hold up well into the winter giving several more months of interest.

True 1 gallon

Agastache 'Purple Haze'

'Black Scallop'

'Burgundy Glow'

'Pink Lightning'

'Catlin's Giant'

'Cordial Canary'

'Silver Queen'

'Parrot Paradise'

'Fierce Falcon'

Ajuga 'Tropical Toucan'

Ajuga

Bugleweed

3-6" tall x 12-36" wide Exposure: part-full shade

Ajuga forms a dense mat of foliage, up to 6" tall, that always looks neat and fresh. In many cases, the leaves are colored with shades of purple, white, silver, cream, or pink. Individual plants grow as a rosette, but their runners intertwine to form a solid carpet that withstands light foot traffic. Flower spikes adorn plants from late spring to early summer. Ajuga is a great groundcover for part to full shade.

'Black Scallop' - near black scalloped leaves with a dense habit. Short 4-6"
pp# 15,815 deep blue flower spikes bloom in mid to late spring

'Burgundy Glow' - features tricolored foliage (white, pink and green) and blue flowers on 6" spikes in late spring

'Catlin's Giant' - a fast growing selection with large, bronze-green leaves, covered in blue flower spikes in April and May. A taller variety growing 6-10" tall.

'Pink Lightning' - soft, mint-green leaves with a distinct creamy white edge;
pp# 22,255 bubblegum pink flower spikes bloom in early May. A sport of A. 'Purple Torch' discovered and introduced by Sunny Border Nursery.

'Silver Queen' - sea green leaves edged in bright, creamy white; medium blue flower spikes bloom in late spring.

Feather Friends Series

This series has shown tremendous vigor, and we are excited to be offering this new line of Ajuga bred by Chris Hansen.

tenorei 'Cordial Canary' - a gold version of the popular Ajuga 'Chocolate
ppaf Chip'. Cordial Canary forms a tight carpet only 3" tall of golden yellow leaves. In spring, it's topped with short spikes of lavender-blue flowers. Morning sun to part shade is needed to retain the best yellow foliage color.

'Fierce Falcon' - glossy dark purple to near black foliage. Cobalt blue
ppaf flowers in spring.

'Parrot Paradise' - crinkled foliage emerges bronze and matures to gold,
ppaf creating a wonderful contrast. A hybrid of *A. tenorei* x *A. reptans*, this is a slow spreading, more well behaved variety. Blue flowers in spring.

reptans 'Tropical Toucan' - its claim to fame is being the world's first ever
ppaf Ajuga with large gold leaves! In spring, plants are topped with short spikes of cobalt blue flowers. Morning sun to part shade is needed to retain the best yellow foliage color.

Quart Sold in flats of 10 *Spring Only*

Allium 'Bubble Bath'

pp# 35,333 — Bubble Bath Ornamental Onion

26-28" tall x 24-26" wide — Exposure: full sun

Tiny star-shaped, light lavender flowers are formed in 3" round globes and are held above strappy blue-green leaves. When compared to Millenium (listed below), Bubble Bath is taller and has larger flowers that are a lighter lavender purple. Like most Allium, this plant is resistant to most damaging disease and insects, while its blooms attract butterflies and bees. A Walters Gardens introduction.

True 1 gallon

Allium 'Bubble Bath'

Allium 'In Orbit'

In Orbit Ornamental Onion

12-16" tall & wide — Exposure: full sun

This ornamental onion is a great addition to the front of the border. Fragrant, soft lavender purple pom-poms bloom from June to September attracting butterflies while the shiny, onion-scented leaves are not bothered by deer!

Trade 1 gallon

Allium 'In Orbit'

Allium 'Lavender Bubbles'

pp# 31,126 — Lavender Bubbles Ornamental Onion

12-14" tall x 20-22" wide — Exposure: full sun

Dark dusky purple flowers are held above glaucous blue-green foliage, blooming in late summer. When compared to Millenium, Lavender Bubbles is slightly shorter, blooms later, and has darker purple flowers. Like most Allium, this plant is resistant to most damaging disease and insects, while its blooms attract butterflies and bees. A Walters Gardens introduction.

True 1 gallon

Allium 'Lavender Bubbles'

Allium 'Millenium'

Millenium Ornamental Onion

12-18" tall & wide — Exposure: full sun

Fragrant, purple pom-pom flowers appear in mid-summer, above strappy, shiny, onion-scented leaves that are not bothered by deer, rabbits, or chipmunks! Compared to other Alliums, Millenium is well-behaved in the garden and does not reseed. PPA Perennial Plant of the Year 2018.

True 1 gallon

Allium 'Millenium'

NEW Allium 'Ostara'

Ostara Ornamental Onion

16" tall x 12" wide — Exposure: full sun

This nectar-rich cross between *A. karativiense* and *A. atropurpureum* produces large, 4-6" globes of rich, reddish-purple flowers that attract hummingbirds, butterflies and other pollinators to the garden. Flowers bloom in late spring to early summer. Easy to care for, needing full sun to some shade and average garden soils. Makes a great cut flower with a long vase life.

2 gallon

Allium 'Ostara'

Allium ‘Serendipity’

Allium ‘Serendipity’

Bubble Bath Ornamental Onion

pp# 32,023

15-20" tall x 10-15” wide Exposure: full sun

This sport of Allium ‘Millenium’ (listed on the previous page) shares all of the qualities that make Millenium great, but with attractive blue foliage. A Proven Winners plant introduced by Walters Gardens.

PW True 1 gallon

Amsonia ‘Blue Ice’

Amsonia ‘Blue Ice’

Blue Ice Blue Star

12-16" tall x 24” wide Exposure: full sun

Blue Ice is a compact Amsonia that produces more flowers and has a longer bloom period than *A. tabernaemontana*. The small, star-like flowers are ice-blue and borne on the tips of the branches in June. Its small, shiny green foliage turns a brilliant yellow in the fall. Tough, easy-to-grow, and trouble free. Will form a dense groundcover.

Trade 1 gallon

Amsonia ‘Starstruck’

Amsonia ‘Starstruck’

Starstruck Blue Star

pp# 32,246

20" tall x 36” wide Exposure: full sun

A compact, hybrid selection of Blue Star perfect for smaller spaces and the front of the flower border. Clusters of light blue, star-shaped flowers bloom in late spring and persist for a couple weeks. After flowering, its medium-green, oblanceolate foliage creates a clean, densely-stemmed habit, turning golden in the fall.

Trade 1 gallon
True 1 gallon

Amsonia ‘Storm Cloud’

Amsonia ‘Storm Cloud’

Storm Cloud Blue Star

24-30" tall x 36” wide Exposure: full sun

Storm Cloud Blue Star emerges in spring as near black stems and silver-veined, dark green leaves. Light periwinkle-blue, star-shaped flowers cover the plant in mid-spring. As the flowers subside, the leaves turn an olive green, and plants may rebloom in late summer.

PW True 1 gallon

Anemone

Windflower

Exposure: sun-light shade

Fantastic perennials for shaded areas, Windflowers provide dramatic color in the fall garden. Blooming in late summer and fall, the delicate, upward-facing flowers come in shades of white to dark pink and are held on long stems well above the dark green palmate foliage. Always eye catching, Japanese Anemones add a unique form and texture to the garden. The taller varieties may require staking when in flower, but those two feet or less generally don't. They will perform equally well in sun if provided consistent moisture.

'Curtain Call Deep Rose'

'Dreaming Swan'

'Curtain Call Deep Rose' - dark rose-pink flowers are semi-double with a classic yellow center. A Walters Gardens introduction, 14-18" tall by 16-18" wide.
pp# 30,520

Dreaming Swan ('Macane004') - semi-double white flowers on an anemone that doesn't spread in the garden! 24" tall, 30" tall in flower
pp# 27,384

'Honorine Jobert' - discovered in 1858 in Verdun, France, this remains an outstanding selection. A vigorous, cultivar featuring large, snow white flowers with yellow center stamens; 36-48" tall. 2016 Perennial Plant of the Year

'Honorine Jobert'

Red Riding Hood

Red Riding Hood ('APANFARRH') - dwarf plant with dark, reddish pink flowers, blooms begin in mid-August; 18" tall, part of the Fantasy series from Plants Nouveau
pp# 28,799

Anemone tomentosa 'Robustissima'

NEW! tomentosa 'Robustissima' - This old fashioned, vigorous growing variety has deep green, grape-leaf-like foliage. Starting in late summer and continuing through fall, the plants are covered in large, single flowers in shades of pink to lavender. Very heat and drought tolerant but still performs best in part shade and even soil moisture. 3' tall x 2-2.5' wide

Trade 1 gallon & True 1 gallon

Aquilegia

Columbine

Exposure: light shade

A staple of the spring garden, Aquileqia form rounded clumps of delicate, apple green, ferny foliage in early spring, and are topped by very showy flowers with long spurs in late spring to early summer. Plants prefer moist but well-drained soil with afternoon shade. Columbine usually go dormant in summer.

Aquilegia 'Earlybird Purple Blue'

Earlybird Series
Large upward facing flowers are held just above the foliage, blooming earlier than most other Aquilegia. Compact plants grow to be 9-12" tall by 8-10" wide.

Earlybird Purple Blue ('PAS1258487') - bicolor wine purple and indigo blue flowers

Earlybird Purple White ('PAS1258486') - bicolor purple and yellow flowers

Aquilegia 'Earlybird Purple White'

Trade 1 gallon

Spring Only

Aralia ‘Sun King’

Aralia cordata ‘Sun King’

Sun King Japanese Spikenard

36-72” tall & wide Exposure: part shade

Tropical, golden yellow leaves all season! Four to six hours of sunlight a day ensures the brightest color. In summer, 2' tall spikes of tiny white flowers appear. These turn into reddish-purple berries, inedible to humans but loved by birds. Be sure to give this large, shrubby perennial plenty of space in the garden.

True 1 gallon

‘Daydream’

‘Hypnotic Dreams’

Armeria pseudarmeria Dreameria Series

Dreameria Sea Pinks

10-12” tall & wide Exposure: sun

From Darwin Perennials, this series offers a new and improved Armeria! We trialed these plants in 2024, and they really did out perform all predecessors. They are heat tolerant, with cute and tidy green basal foliage, topped by lollipop-like flowers. The flowers hold both their form and color, and continue blooming all summer long. Dead-heading is not needed but does increase the number of new blooms.

’Dreameria Daydream’ - light pink flowers
pp# 29,381

’Dreameria Hypnotic Dreams’ - ruby red blooms
pp# 36,461

’Dreameria Vivid Dreams’ - deep purple blooms
pp# 35,236

Aruncus ‘Chantilly Lace’

NEW Aruncus 'Chantilly Lace'

pp# 30,740

Misty Lace Goat's Beard

24-32” tall x 40-48” wide Exposure: sun to part shade

This part shade-loving plant produces beautiful sprays of lacy, cream-colored flowers in late spring to early summer. It is very floriferous when it's in bloom, completely covering the deep green foliage. Chantilly Lace will be shorter if grown in full sun, closer to 24" tall, than if grown in shade or a sun-filtered area, where it will grow to a height of 30-32".

PW True 1 gallon

Aruncus ‘Fairy Hair’

NEW Aruncus ‘Fairy Hair’

pp# 30,242

Misty Lace Goat's Beard

20-24” tall & wide Exposure: sun to part shade

Creamy white flowers on triangular flower spikes hover above the foliage in early to mid summer. Despite the fine, thin texture of the leaves, the foliage is substantial and forms a solid clump.

Trade 1 gallon

Aruncus 'Misty Lace'

pp# 15,798

Misty Lace Goat's Beard

18-24" tall & wide Exposure: sun to part shade

A unique hybrid seedling discovered by Allen Armitage, Misty Lace is a dwarf Goat's Beard, growing 2' tall by 2' wide. In spring, red stems support large, creamy white blooms that float above the delicate, ferny foliage. A very hardy specimen, it can take full sun if given enough moisture.

True 1 gallon

Aruncus 'Misty Lace'

Asclepias & Monarchs

Commonly known as Butterfly Weed or Milkweed, Asclepias are the primary food source for Monarch caterpillars. Known for the incredible mass migration that brings millions of them to California and Mexico each winter, North American monarchs are the only butterflies that make such a massive journey—up to 3,000 miles. Only monarchs born in late summer or early fall make the migration, and they make only one round trip. By the time next year's winter migration begins, several summer generations will have lived and died and it will be the great grandchildren of last year's migrators that make the trip. Yet somehow these new generations know the way and follow the same routes their ancestors took—sometimes even returning to the same tree. Scientists are concerned about the eastern population of monarchs, which summer east of the Rocky Mountains. This group is occurring in ever smaller numbers, and its survival is threatened by reduced acreage of milkweeds and nectar sources in their summer home. To do our part to help the Monarchs, we are offering 6 varieties of Milkweed for 2026. We never treat our Asclepias with neonicotinoid insecticides so they may be shipped with Monarch caterpillars.

Asclepias i. 'Soulmate'

Asclepias incarnata

Swamp Milkweed

36-60" tall by 24-36" wide Exposure: full sun

Swamp Milkweed is a hassle-free perennial with compact clusters of vanilla scented flowers in shades of pink to white from mid-summer to early fall. Erect clumps of non-branching stems typically grow to 3-4' tall but can reach 5' when they're very happy. Dried seed pods are interesting and are frequently used in arrangements, and the long stems are wonderful for cutting. These natives prefer moist sites, but will adapt to most garden soils.

'Cinderella' – pink flowers

'Ice Ballet' – white flowers and a bit more compact than Soulmate

'Soulmate' – dark rose pink flowers, this variety tends to branch more than the straight species

True 1 gallon

Asclepias i. 'Ice Ballet'

Asclepias i. 'Soulmate'

Asclepias syriaca

Asclepias syriaca

Common Milkweed

36-48" tall x 12" wide Exposure: full sun

This native Milkweed typically grows 3-4' tall on thick, upright stems. Blooming in June and July, it features fragrant, light pink flowers that smell like honey. These are followed by prominent, warty seed pods which split open when ripe releasing their silky-tailed seeds for dispersal by the wind. Once commonly seen along roadsides and fields, this native plant is becoming scarce due to the widespread use of herbicides (glyphosate) on genetically modified farm crops and the resulting habitat destruction. Monarch caterpillars prefer Common Milkweed for dinner over Swamp Milkweed or Butterfly Weed.

True 1 gallon

Asclepias tuberosa ssp. interior

Asclepias tuberosa ssp. interior

Butterfly Weed

18-24" tall & wide Exposure: full sun

This tough, drought tolerant native produces eye-catching orange flowers in summer that attract many varieties of butterflies, especially Monarchs. The dried seed pods are interesting in shape and are frequently used in arrangements. Subspecies interior performs better in average garden soils. Primarily a nectar source rather than a caterpillar food source.

Baptisia 'Indigo Spires'

Begonia grandis

Begonia grandis

Hardy Begonia

20-24" tall & wide Exposure: part shade to shade

A tropical looking perennial with large, dark green leaves on top and blood red underneath. Sprays of shell-pink flowers and seed capsules are produced beginning in late summer, continuing until mid-fall. Mother plants require sharp drainage to overwinter, but small bulbils will overwinter in well-drained mulch or gravelly. Plants are late to break dormancy in the spring.

True 1 gallon *Summer Only*

Belamcanda 'Freckle Face'

Belamcanda chinensis 'Freckle Face'

Freckle Face Blackberry Lily

18-24" tall x 8-12" wide Exposure: sun

Freckle Face features showy orange flowers with heavy red freckling, up to 2" wide. Seed pods burst open in the fall to display black-purple seeds that resemble blackberries. Strappy, olive green leaves are similar to iris foliage, sturdy and drought resistant. Can tolerate drier soils.

True 1 gallon & 2 gallon

Bletilla striata

Bletilla striata

Chinese Ground Orchid

8-12" tall by 6-12" wide Exposure: afternoon shade

Chinese Ground Orchid is a terrestrial orchid which produces small, cattleya-like, pinkish-purple flowers in clusters atop naked scapes, typically rising to 18" tall. Blooms in late spring and prefers a cool woodland or shady rock garden. For best overwintering success, choose a site that is well-drained, and cover the crown in a thick layer of mulch to insulate the plant during the winter.

Trade 1 gallon

Brunnera 'Alexander's Great'

Brunnera macrophylla 'Alexander's Great'

pp# 25,789

Alexander's Great Siberian Bugloss

12-18" tall x 30" wide Exposure: part shade to shade

The HUGE heart shaped leaves of Alexander's Great are double the size of *B.* 'Jack Frost'. They have a heavy silver overlay with prominent dark green veins and unique, spiraled leaf-bases. Great for brightening up dark shady areas. Brunnera produce tiny, blue, Forget-Me-Not type flowers in early spring.

Trade 1 gallon

Brunnera 'Jack Frost'

Brunnera macrophylla 'Jack Frost'

Jack Frost Siberian Bugloss

12-18" tall x wide Exposure: part shade to shade

The heart shaped leaves of Jack Frost have a heavy silver overlay with prominent green veins and are wonderful for brightening up dark shady areas. It produces tiny, blue, Forget-Me-Not type flowers in early spring. One of the best selections of Brunnera we have grown because it is more tolerant of sun and drier soils. 2012 Perennial Plant of the Year.

True 1 gallon

Brunnera macrophylla 'Variegata'

Variegated Siberian Bugloss

12-15" tall & wide Exposure: shade

Small, forget-me-not flowers bloom on airy, branched racemes rising well above the foliage on slender stems to 15" tall in spring. Bold, irregular, creamy white leaf margins glow in the shade! These eye-catching leaves form a foliage mound which remains attractive throughout the growing season. Mix with heucheras and ferns for a border with lots of contrast and color.

Campanula carpatica

Carpathian Bellflower

Exposure: full sun to afternoon shade

This mounding perennial is native to the Carpathian Mountains in Europe. Showy, upward facing, cup-shaped flowers bloom above the foliage in late spring to early summer. They perform best in average, well-drained soil and appreciate afternoon shade during our hot and humid summers. Mulching also helps to keep their root zone cool. If plants begin to look tired after flowering, they can be pruned back to the basal foliage and they may bloom again. Clumps should be divided every two to four years to maintain plant vigor. Divide in spring or late summer for best results.

'Rapido Blue' - violet blue flowers in late spring to early summer, 5-8" tall and wide

'Rapido White' - white flowers in late spring to early summer, 5-8" tall and wide

Trade 1 gallon

Campanula 'Rapido Blue'

Campanula 'Rapido White'

Campanula Blue Waterfall

Campanula poscharskyana Blue Waterfall ('Camgood')

Blue Waterfall Serbian Bellflower

8-10" tall x 18-24" wide Exposure: sun to light shade

Aptly named, the vibrant blue-purple, star-shaped flowers pour like water over the foliage of this Bellflower. Flowers face upwards and are so numerous the foliage is completely covered from late spring into mid-summer. A vigorous spreading ground cover, the flowers will often repeat into fall. Does not like wet soils in winter.

Trade 1 gallon

Campanula 'Bellefleur Blue'

Campanula glomerata

Clusterd Bellflower

Exposure: full sun to afternoon shade

This upright perennial forms a dense clump of toothed, sometimes hairy foliage. Showy, upward facing, bell-shaped flowers bloom in terminal clusters above the leaves, from late spring to early summer. Dead-head plants to encourage rebloom, and discourage spreading via seed. They perform best in average, well-drained soil and appreciate afternoon shade during our hot and humid summers. Clumps should be divided every three to five years to maintain plant vigor or control especially happy plants. Divide in spring or late summer for best results.

'Bellefleur Blue' - a dwarf selection with vivid purple-violet flowers, growing 6-10" tall by 12-24" wide. From Syngenta Flowers.

'Bellefleur White' - a white flowering companion to Bellefleur Blue, slightly taller, growing 8-12" tall by 12-24" wide

True 1 gallon

Campanula 'Bellefleur White'

Campanula persicifolia 'Takion Blue'

Takion Blue Peachleaved Bellflower

16-20" tall by 12-16" wide Exposure: sun to light shade

Peachleaved Bellflowers are showy and elegant plants for the perennial garden. The Takion Series was selected for its shorter stature and good branching habit. The flower stems ascend from the evergreen basal foliage in early spring and are covered with upward facing, broadly bell-shaped, blue-lavender flowers. This is an excellent and long lasting cut flower and plants will seed around a bit if happy. It is an F1 hybrids and seedlings may differ from the parent plant.

Trade 1 gallon

Campanula 'Takion Blue'

Catananche caerulea

Cupid's Dart

12-24" tall by 12" wide Exposure: sun

Cupid's Dart is a short-lived perennial with lavender-blue flowers on wiry stems, resembling our wild chicory. This Mediterranean native must be planted in well-drained soil to ensure success in the garden. Early Greeks and Romans used this plant to make love potions, hence the common name of Cupid's Dart.

Trade 1 gallon

Catananche caerulea

Centranthus ruber 'Coccineus'

Red Jupiter's Beard

24" tall x 16" wide Exposure: Full Sun

Blooming in late spring, the fragrant, carmine-rose flowers of Centranthus are butterfly magnets! Shear off spent flowers to prevent re-seeding and to encourage sporadic flowering throughout summer. This Mediterranean native prefers drier sites with well-drained soil.

True 1 gallon

Centranthus 'Coccineus'

Ceratostigma plumbaginoides

Blue Leadwort

8-12" tall x 12-18" wide Exposure: sun-shade

A great groundcover, very late to emerge in spring, with small, glossy green leaves and a beautiful red-purple fall color. Clusters of blue flowers are held above the leaves from late summer until frost. Easy and adaptable, will grow in full sun or shade.

True 1 gallon

Ceratostigma plumbaginoides

Chelone lyonii 'Hot Lips'

Hot Lips Turtlehead

24-30" tall x 18-24" wide Exposure: sun-part shade

This Midwest native is known for its distinctive flowers that are shaped like a turtle's head with its mouth open. Hot Lips has rose-pink flowers with dark green, thick, almost plastic-looking foliage. Great for planting near streams or ponds.

True 1 gallon

Chelone 'Hot Lips'

Cimicifuga racemosa 'Pink Spike'

Pink Spike Bugbane

24-48" tall (72" in flower) x 24" wide Exposure: part shade to shade

Flowering in late summer, the fragrant blooms begin soft pink and lighten to white as they mature. This plant makes an excellent vertical accent in the shade garden and the purple lacy leaves contrast nicely with hostas. Bugbane benefit from organic matter being added to the soil when planted. Also known as Black Cohosh and Snakeroot.

Trade 1 gallon

Cimicifuga 'Pink Spike'

Cimicifuga simplex 'Prichard's Giant'

Prichard's Giant Bugbane

36-60" tall x 24" wide Exposure: part shade to shade

Prichard's Giant Bugbane produces large mounds of lacy green foliage that is covered in tall spires of sweetly scented white flowers in late summer-fall. Slow to reach maturity, this plant makes an excellent vertical accent in the shade garden. Grows best in moist, humus-rich soils.

Trade 1 gallon & True 1 gallon

Cimicifuga 'Prichard's Giant'

Clematis maximowicziana

Clematis maximowicziana (paniculata, ternifolia) — Sweet Autumn Clematis

10-15' long vines — Exposure: sun-light shade

This vigorous grower produces a solid sheet of small, incredibly fragrant, white flowers in August. Sweet Autumn Clematis will not die to the ground each year, but some terminal dieback may occur. Great for covering up fences, abandoned cars, slow moving animals, etc…

True 1 gallon

Clematis montana 'Rubens'

Clematis montana 'Rubens' — Pink Anemone Clematis

20' long vines — Exposure: sun-light shade

This large, deciduous climber is covered in single, mauve-pink, vanilla scented flowers from late spring to early summer. A vigorous grower and extremely floriferous, it's perfect for a trellis, fence or arbor and makes for an interesting groundcover. Clematis like full sun for the foliage but shaded roots. Flowers on old wood, no regular pruning needed.

2 gallon

Coreopsis

Valued for their colorful flowers, Coreopsis are low maintenance, drought tolerant, and long blooming. Native to US prairies, the flowers attract butterflies, and their seeds are enjoyed by Goldfinch and other birds.

There is an incredible amount of variety among Coreopsis, including broadleaf vs threadleaf, tall vs short, and flower colors including pinks, reds, yellows, oranges, whites, and bi-colors. Most Coreopsis are clump forming.

Coreopsis should be sited in full sun and average garden soils with good winter drainage. Fertilize once in spring for rich green color, good growth and abundant flower production. Deadheading will keep the plants tidy and promote rebloom; however, leave some seed heads for the birds in fall and winter.

Coreopsis 'Candy Stripes'

Coreopsis 'Candy Stripes'

pp# 33,888 — Candy Stripes Coreopsis

10-12" tall x 16-18" wide — Exposure: sun

Delosperma Rock Crystal Series

Ice Plant

6" tall x 12" wide Exposure: full sun

The Rock Crystal series consists of petite, low-growing varieties of Delosperma, with a tight dense habit, hardy to zone 6. Delosperma love hot dry locations and detest wet winter soils. From Dummen Orange.

'Rock Crystal Candy Red' - bright red flowers

'Rock Crystal Orange' - orange flowers

'Rock Crystal Pink' - pink flowers

'Rock Crystal Purple' - purple flowers

'Rock Crystal Red' - dark red flowers

'Rock Crystal Yellow' - yellow flowers

Quart Sold in flats of 10

Delphinium elatum 'Magic Fountain Mix'

Magic Fountain Delphinium

30-36" tall x 18" wide Exposure: full sun to part shade

The Magic Fountain series are more compact than traditional Delphiniums, perfect for today's smaller gardens. They form neat mounds of deeply cut, rich green leaves. Tall flower spikes bloom in early summer. This heavy feeder prefers rich, well-drained soil. Remove spent flowers to encourage rebloom. Delphinium dislike hot humid summers, if plants get mildew or begin to look raggedy, cut back hard to encourage fresh growth. A mix of many shades of blue, pink, and white flowers, with both white and dark bees.

Besides the mix, we'll also be selling these non-mixed varieties:

'Cherry Blossom' - pink flowers with a white bee

'Dark Blue/White Bee' - dark blue flowers with a white bee

True 1 gallon

Delphinium 'Magic Fountain Cherry Blossom'

'Magic Fountain Mix'

Delphinium 'Magic Fountain Dark Blue/ White Bee'

Dianthus barbatus

Sweet William

Exposure: sun

Sweet William is a low maintenance, heat tolerant, cottage garden classic. Flowering starts in late spring and continues through summer. These sturdy plants have straight stems making them excellent cut flowers, with a light, sweet fragrance. Sweet Williams tend to be biennial, so be sure to leave a few seeds heads in the fall, to allow new plants to emerge in the spring.

'Barbarini Purple Picotee' - vibrant purple flowers with magenta eyes; 6-8" tall by 8-12" wide

'Beauty Homeland' - velvety, dark red flowers with crisp white eyes; 18-20" tall by 12" wide

'Rockin Red' - eye-catching ruby red flowers, 18-24" tall by 12" wide

Trade 1 gallon & True 1 gallon

'Rockin Red'

'Beauty Homeland'

Dianthus

Pinks

Exposure: sun

Dianthus are highly prized for their eye-catching, fragrant flowers, blooming in late April to late May. Happy plants form a tight, spreading, semi-evergreen groundcover. Flower forms range from single to fully double, in hues of white, pink, reds, and bi-colors. Dianthus perform best with good drainage, moderate fertility, and average moisture. Plants look cleaner if spent flowers are removed in early summer.

Coconut Surprise ('WP05 Yves') - double white flowers with dark red centers above glaucous, gray-blue leaves, 6-9" tall x 9-12" wide; part of the Scent First series. Landscapers tell us this variety continues to flower longer than typical Dianthus.
pp# 18,828

Everlast Cherry Swirl ('KLEDG22394') - semi-double white flowers accented with cherry red. Very fragrant, 8-12" tall x 10-14" wide.

'Everlast Pink to White' - double flowers in shades of pink and white, 8-12" tall

'Everlast Ruby Edge' - ruby colored flowers edged in pink with a pink eye, 8-12" tall

'Everlast Violet Blue' - violet blue flowers edged in red; 8-10" tall

Pinball Wizard ('WP15 Mow08') – large, double soft pink flowers that are streaked and speckled with hot pink above glaucous, gray foliage, 12" tall; Devon Cottage series.

'Alba'

'Gold Heart'

'Ruby Gold'

Dicentra 'Valentine'

'Dalmatian Peach'

'Dalmatian Rose'

Digitalis 'Dalmatian Purple Improved'

Dicentra spectabilis — Old Fashioned Bleeding Heart

24-36" tall x 18-30" wide Exposure: sun-part shade

The heart-shaped flowers are held above the foliage on arched stems from May to June. A large, robust perennial with glaucous green, dissected leaves. It will go dormant in late June if in full sun, but can hold until August in shade. Makes an excellent cut flower.

D. spectabilis - the original, pink flowers; 36" tall

'Alba' - white flowers, 30-36" tall

'Gold Heart' - pink heart-shaped flowers and glowing gold foliage, 24-30" tall

'Ruby Gold' - gold foliage tinged with orange, on pink-orange stems and brilliant red flowers, said to be more vigorous than Gold Heart, 26-32" tall
ppaf

Valentine ('Hordival') - dark rose-pink flowers on burgundy stems and darker green foliage, 24-30" tall
pp# 22,739

True 1 gallon *Spring Only*

Digitalis purpurea Dalmatian Series — Dalmatian Foxglove

24-36" tall x 12" wide Exposure: full sun to afternoon shade

The Dalmatian series was bred for uniformity, a great habit, early summer flowers, and better longevity in the garden. However, these are short lived perennials. Plant in well-drained soil and remove most of the spent flower stems to encourage the plants to overwinter. Leaving some seed will help the colony to perpetuate. Be aware, all parts of this plant are poisonous.

'Dalmatian Peach' - flowers open pinkish peach and then lighten to a soft peach color with tiny orange speckled throats.

'Dalmatian Purple Improved' - large spikes of outward facing, lilac purple flowers with maroon spotted throats on sturdy, upright stems; Fleuroselect Gold Medal winner

'Dalmatian Rose' - rose-purple flowers with purple spotted, white interiors

True 1 gallon

Digitalis 'Foxybee Dark Red'

Foxybee Dark Red Foxglove

36-48" tall x 18-24" wide Exposure: full sun to part shade

From Jelitto Seeds, this new Foxglove features large, dark red-purple flowers with white and maroon speckles decorating the interior. Plant in well-drained soil and remove the spent flower stems to ensure the plant will reappear next spring. Be aware, all parts of this plant are poisonous.

True 1 gallon

Digitalis 'Foxybee Dark Red'

Dracocephalum arguense Fuji Series

Dragon's Head

8-12" tall & wide Exposure: sun to light shade

In late spring to early summer, the short plants are covered with flowers that look like miniature snapdragons. Small, shiny, dark green, rosemary-like leaves are thick and leathery. They hold their color and shine very reliably throughout the summer, eventually developing a yellow to red fall color. A great plant for the rock garden that performs equally well in good garden soils. Very drought tolerant.

'Fuji Blue' - rich blue flowers

'Fuji White' - snow white flowers with a blue spotted throat

True 1 gallon

Dracocephalum 'Fuji Blue'

Dracocephalum 'Fuji White'

Echinacea

Prized for their large, brightly colored flowers, coneflowers have become a mainstay in today's landscapes. Their color and form combine equally well in the wildflower or urban garden. Most varieties make excellent cut flowers. The cones hold up well into winter providing architectural interest as well as attracting seed eating birds (however, double flowers are sterile and do not produce seed). Echinacea perform best in full sun to light shade. They prefer consistent moisture to avoid leaf burn and early petal decline. Being native, they are well adapted to our soils and climate. Height listed is in flower. We hope to have 30 varieties available.

Echinacea 'Aloha'

pp# 23,525

Aloha Coneflower

28-32" tall & wide Exposure: sun-light shade

A unique color! Wide, melon-yellow petals surrounding orange cones are held on strong stems above the rich green foliage. Aloha blooms all summer and into early fall. Part of the Prairie Pillars Collection from Terra Nova Nurseries.

True 1 gallon

Echinacea 'Aloha'

Echinacea 'Cheyenne Spirit'

Echinacea 'Cheyenne Spirit'

Cheyenne Spirit Coneflower

22-30" tall x 18-28" wide Exposure: sun-light shade

Flowers in rich shades of tomato red, golden yellow, near-fluorescent orange, white, and magenta from June to September. Though the height and bloom time of each color varies slightly, they are all very well-branched, bushy plants. Bred and introduced by Kieft-Pro Seeds, 2013 AAS Winner. Triple stuck for multi-colored pots. Seedlings of Cheyenne Spirit will bloom in multiple colors the following year.

True 1 gallon

ppaf

Fringe Festival Coneflower

16" tall x 14" wide Exposure: sun-light shade

The vibrant raspberry-pink flowers look like shaggy balls, the blooms attracting butterflies and other pollinators to the garden from July to fall. Great for the mid to front of the border, flowers will reach 16" tall. Drought tolerant once established, and generally ignored by deer and rabbits.

True 1 gallon

Echinacea Kismet Raspberry

Echinacea Kismet Raspberry ('TNECHKR')

pp# 28,768

Kismet Raspberry Coneflower

16-18" tall x 24" wide Exposure: sun-light shade

The Kismet series from Terra Nova Nurseries features large, single flowers, in vibrant colors, held above the incredibly floriferous plant on strong stems all summer. Flowers hold their saturated color for weeks before maturing to a complimentary color. Kismet Raspberry has large raspberry pink flowers that mature to dusty pink.

True 1 gallon

Echinacea PRIMA 'Berry'

Echinacea PRIMA 'Berry'

Prima Berry Coneflower

16-18" tall x 24" wide Exposure: sun-light shade

The Prima Collection from Terra Nova Nurseries features large, single flowers on short, tight, stout plants. Floriferous and well-branched. PRIMA Berry has long, draping petals that are dark berry pink. Terra Nova says, "The largest flowers we have seen on such a tight, compact habit."

True 1 gallon

Echinacea purpurea

Purple Coneflower

24-36" tall x 18-24" wide Exposure: sun-light shade

This native prairie plant is a strong, fast growing perennial that produces an abundance of daisy-like flowers of a rich rose-pink color from June to August. It's an adaptable plant that is tolerant of drought, heat, humidity and poor soil. Because this is produced from seed there may be some variability among plants. This coneflower is also the most attractive to butterflies and other pollinators.

True 1 gallon

Echinacea purpurea

Echinacea purpurea 'Magnus Superior'

Magnus Superior Coneflower

36" tall x 18-24" wide Exposure: sun-light shade

Magnus Superior, introduced by Jelitto Seed, is an improved form of Magnus. Upgrades include deeper lavender rays, larger copper cones, darker purple stems, more consistent growth rate, and less variability among plants.

True 1 gallon

Echinacea 'Magnus Superior'

Echinacea purpurea 'Ruby Star'

Ruby Star Coneflower

24-36" tall x 18-24" wide Exposure: sun-light shade

Ruby Star features large (up to 4" across), flat-topped, deep purple-pink flowers petals surrounding a dark bronze cone, held above the plants on contrasting dark stems. Blooms from mid-June to August. Compared to *E.* 'Magnus', the flowers are more substantial with a deeper color. Introduced by Jelitto Seed.

True 1 gallon

Echinacea 'Ruby Star'

Echinacea SUNDIAL 'Pink'

SUNDIAL Pink Coneflower

24" tall x 18-22" wide Exposure: sun-light shade

Novel anemone type flowers are highlighted by long arching petals. Massive 5″ blooms sport emerald green eyes that give way to a vibrant pink cone and bubblegum pink petals. Plants branch from the base for a nice full look. Part of the Sundial series from Terra Nova Nurseries.

pp# 30,410 Yellow Rainbow Marcella Coneflower

12-15" tall x 18-24" wide Exposure: sun-light shade

A yellow version of the original Rainbow Marcella. Lemon-yellow flowers have a bubblegum pink ring surrounding the dark cone, blooming mid-summer to early fall. This is a compact perennial with sturdy stems. Part of Arie Blom's Butterfly series.

True 1 gallon

Echinacea Yellow Rainbow Marcella

Eryngium yuccifolium

Eryngium yuccifolium — Rattlesnake Master

36-60" tall x 24-36" wide Exposure: sun

This odd looking plant resembles yucca with its rosette of spiny, long, narrow, blue-green leaves. The unique flowers are whitish green, prickly spheres that are held well above the leaves in early to mid-summer, attracting a multitude of pollinators. Native to our tallgrass prairies, Rattlesnake Master thrives in rich, well-drained sites. Native Americans used the fibrous leaves of this perennial for weaving purposes, like making sandals and baskets. The sap and roots were also used to treat a wide variety of ailments, including the (unsuccessful) prevention and treatment of snake bites.

True 1 gallon

Erysimum 'Erysistible Fire'

NEW Erysimum Erysistible Series — Erysistible Wallflower

16-22" tall x 12-16" wide Exposure: sun to light shade

The first Erysimum series hardy to zone 5. Flowers bloom in early spring and then again in fall. This series has a well-branched, controlled habit.

'Erysistible Fire' - glowing fire red flowers
ppaf

Erysimum 'Erysistible Yellow Pink'

Eupatorium dubium 'Baby Joe'

pp# 20,320

Baby Joe-Pye Weed

30-36" tall x 18-24" wide Exposure: full sun

An eastern native, this Joe-Pye Weed will grow to three feet tall and has bright green foliage with cabernet-colored flowers in late summer. Its smaller stature and slower growth rate make it much more suited for today's gardens. Eupatorium tolerates wet soil but will exhibit leaf scorch in dry locations.

True 1 gallon

Eupatorium 'Baby Joe'

Eupatorium 'Pink Frost'

Eupatorium fortunei 'Pink Frost' — Pink Frost Joe-Pye Weed

30-36" tall x 18-24" wide Exposure: sun to part shade

This unusual variegated form of the Japanese Joe-Pye Weed has deeply serrated, green leaves with a creamy white edge. In late summer, the clumps are topped with small clusters of rich pink flowers that last into fall. Will perform best in slightly moist, well-drained soil.

True 1 gallon

Eupatorium maculatum 'Red Dwarf'

Red Dwarf Joe-Pye Weed

36" tall x 18-24" wide Exposure: full sun

Shorter than the species, reaching only 3' tall, with black-purple stems and lavender pink flowers in mid to late summer. Performs best in full sun and moist, well-drained soil but is a forgiving plant and will tolerate light shade.

True 1 gallon & 2 gallon

Eupatorium 'Red Dwarf'

NEW Eupatorium 'Monarch Madness White'

Monarch Madness White Joe-Pye Weed

36" tall x 18-24" wide Exposure: full sun

Don't be intimidated by this wonderful natives height. At the end of May, first of June, cut the foliage height in half. The plant will grow bushy, and shorter by several feet. The large umbels of pure white flowers in late summer attract butterflies and seed eating bird such as Goldfinch. Can use as a specimen, hedge or accent planting. Moist to average soils.

True 1 gallon

Eupatorium 'Monarch Madness White'

Filipendula rubra 'Venusta'

Queen of the Prairie

36-60" tall by 24" wide Exposure: sun to light shade

This impressive native is not for the faint of heart or the small garden. Plants thrive in moist soils and will easily attain a height of 5'. Intense rose-pink flowers are borne on 6-9" wide panicles in summer. After flowering, cut plants back hard. New foliage will re-grow to about 2' and remain fresh looking until frost. Does not do well in drought conditions.

True 1 gallon

Filipendula 'Venusta'

Arizona Apricot

Arizona Red Shades

Gaillardia aristata

Blanket Flower

12" tall & wide Exposure: full sun to light shade

This species is native to the Western U.S., found in the dry spots of meadows, prairies, and mountain foothills. Gaillardia love poor sandy soils and need great drainage to successfully overwinter in our area. Blooms begin in early summer, continuing into fall. The seeds that follow are loved by birds like Goldfinch.

Arizona Series - bred by Benary Seed

'Arizona Apricot' - large, apricot flowers with yellow tips and a dark orange center

'Arizona Red Shades' - large, crimson red flowers. Because this is a seed strain, about 20% of the flowers will have slight yellow tips.

'Arizona Sun' - fiery red flowers tipped in bright yellow. 2005 AAS Flower winner and 2005 Flueroselect Gold Medal winner.

'Arizona Sun'

'Spintop Mango'

Spintop Series - more compact than the Arizona Series

NEW 'Spintop Mango' - soft orange flowers, each petal tipped in yellow

True 1 gallon

Mesa Bright Bicolor

'Spintop Red Starburst'

Gaillardia x grandiflora

Blanket Flower

14-16" tall x 20-22" wide Exposure: full sun - light shade

A hybrid of the Western perennial *G. aristata* crossed with our annual *G. pulchella*, creating a plant that blooms like an annual from late spring until frost, but returns every spring. However, great drainage is needed to successfully overwinter in our area, and low fertility will prevent leggy, floppy plants. The seeds that follow the spent blooms are loved by birds like Goldfinch. The Mesa series was developed by Kieft Seed.

Mesa Bright Bicolor ('PAS888652') - bright yellow flowers with a red eye encircling a large brown cone. Temperature dictates the width of the red band

Mesa Peach ('PAS907056') - peach colored petals dipped in yellow surrounding an orange center

Mesa Red ('PAS933516') - dark red flowers that don't fade

Mesa Yellow ('PAS888653') - dazzling, sunshine yellow blooms sit high above the foliage (photo on next page)

True 1 gallon

Mesa Red

Mesa Peach

'Steffi Blush Pink'

Mesa Yellow

Gaura lindheimeri Steffi Series

Steffi Wandflower

18-24" tall & wide Exposure: sun

The Steffi series sports a bushy rounded form with robust dark green leaves and an abundance of upright spikes blanketed with flowers. This Wandflower blooms from late spring through late summer. Excellent heat and drought tolerance.

'Steffi Blush Pink' - blush pink flowers

NEW 'Steffi Dark Rose' - dark rose flowers

'Steffi White' - white flowers

True 1 gallon

'Steffi Dark Rose'

'Steffi White'

Geranium macrorrhizum 'Bevan's Variety'

Bevan's Variety Bigroot Geranium

8-12" tall x 18-24" wide Exposure: light shade

Bright, magenta-pink flower clusters adorn this perennial in spring. Bevan's Variety forms a tight, dense groundcover of large, fuzzy, green leaves. The soft, pubescent leaves smell like pine or dryer sheets (depending on who you ask) making them very resistant to deer. This semi-evergreen, cool season plant benefits from a hard pruning after the first flush of flowers for cleaner summer foliage.

True 1 gallon

Geranium 'Bevan's Variety'

Geranium pratense 'Dark Reiter'

Dark Reiter Meadow Cranesbill

8-10" tall x 12" wide Exposure: sun to light shade

Finely dissected, dark purple leaves show off the bright lilac-blue flowers that bloom all summer! Deadheading encourages rebloom in fall and helps maintain a neat habit. Dark Reiter combines very well with silver toned plants. It has self-seeded occasionally in our garden, but never weedy and always welcome with its purple foliage as a nice contrast in most situations.

True 1 gallon

Geranium 'Dark Reiter'

Geranium cantabrigiense 'Karmina'

Karmina Cranesbill

6-12" tall & wide Exposure: sun to part shade

Masses of soft pink flowers cover the foliage of Karmina for an extended duration from May to July. Rich, glossy semi-evergreen foliage is aromatic when bruised and turns wine red in fall. It performs best in afternoon shade and amended soils but will persist surprisingly well through drought.

True 1 gallon

Geranium 'Karmina'

Geranium ‘Lancastriense’

Geranium sanguineum 'Lancastriense' — Lancaster Cranesbill

6-9" tall x 12-18” wide Exposure: sun to part shade

This harder to find Geranium is almost identical to Max Frei in foliage and habit but sports larger pale pink flowers that absolutely glow. Another synonym for this plant is *Geranium sanguineum var. striatum* because each delicate flower is striped in hot pink. Typically blooms the same time as Max Frei.

True 1 gallon

Geranium 'Max Frei'

Geranium sanguineum 'Max Frei' — Max Frei Cranesbill

8-10" tall x 30” wide Exposure: sun to light shade

One of the most popular perennial geraniums due to its compact habit, Max Frei has intense reddish purple flowers that cover the plants from May to June and sporadically all summer. Bright green finely dissected foliage is deer and rabbit resistant and makes an excellent groundcover for the garden.

Trade 1 gallon & True 1 gallon

Geranium 'New Hampshire Purple’

Geranium sanguineum 'New Hampshire Purple' — New Hampshire Purple Cranesbill

12” tall x 12-18” wide Exposure: sun to light shade

A profusion of rose-red flowers form atop compact, spreading mounds of leaves from late spring to midsummer. The intricately cut leaves are green for most of the season but turn a brilliant crimson-red in fall. This species is so adaptable that it handles both hot summer and cold winter climates with ease.

True 1 gallon

Geranium ‘Rozanne’

Geranium 'Rozanne' — Rozanne Cranesbill

12-18" tall x 24-36” wide Exposure: light shade

Rozanne is a vigorous spreading geranium with bright green leaves and chartreuse marbling. Large, 2", blue-violet flowers with a light eye are produced from late spring to early fall. These plants flower like an annual in the landscape with a non-stop show of bright blue flowers. Perennial of the Year for 2008.

Trade 1 gallon

Geum 'Sunkissed Lime'

Geum 'Sunkissed Lime'

pp# 26,622 — Sunkissed Lime Avens

9-12" tall x 12-16” wide Exposure: sun to light shade

Eye-catching! This exciting Geum from Terra Nova has brilliant, electric lime leaves and bright orange flowers. By far, it is the most interesting Geum we've ever grown. Plants stay short and compact, and the showy foliage doesn't burn in full sun.

True 1 gallon

Geum 'Totally Tangerine'

pp# 22,041 — Totally Tangerine Avens

12-30" tall x 9-18" wide — Exposure: sun to light shade

Because this selection is sterile, its orange-yellow flowers are continually produced throughout the summer. Some sources claim that it produces about 5 times as many flowers as a typical Geum! It is clearly the most floriferous form we grow. Avens perform best in Ohio with afternoon shade and even soil moisture.

True 1 gallon

Geum 'Totally Tangerine'

Gypsophila paniculata Summer Sparkles ('ESM Chispa')

pp# 19,318 — Summer Sparkles Baby's Breath

24" tall x 30-40" wide — Exposure: sun

Unlike most Baby's Breath which have an open habit and go dormant in late summer, Summer Sparkles is compact and refined, looking great all season. It forms a dense, round clump of gray-green foliage that becomes completely covered in flowers from late spring through mid-summer. The white flowers are small, semi-double, and slightly fragrant. Deadheading will encourage the plant to rebloom. Needs a well-drained site to successfully overwinter.

True 1 gallon

Gypsophila Summer Sparkles

Helenium Mariachi Series — Sneezeweed

18-24" tall & wide — Exposure: full sun

Hybridized by Arie Blom of AB Cultivars, the Mariachi Series features incredibly vibrant flowers on shorter, 24" tall plants, more suited to today's smaller gardens. These bright summer blooms bring life to the perennial garden at a time when many plants are looking hot and dry. Sneezeweed tolerates a wide range of growing conditions but performs best in damp soils in full sun. It makes a wonderful cut flower with a long vase life.

Gypsophila Summer Sparkles

'Bandera' - brick red flowers with gold halo
pp# 27,397

'Siesta' - bluish red petals surround a maroon cone with yellow highlights
pp# 25,969

True 1 gallon *Late Summer Only*

Helenium 'Siesta'

Helenium 'Short 'n Sassy'

pp# 24,460 — Short 'n Sassy Helen's Flower

12-16" tall x 24" wide — Exposure: full sun

Bright orange and gold flowers with a chocolate brown cone glow on this petite Helen's Flower. While most Heleniums put out a single flush of flowers, this dwarf continues to produce flowering stems from the crown, through the summer and well into fall. New blossoms tend to cover older spent blooms, keeping Short 'n' Sassy looking fresh and clean.

True 1 gallon

Helenium 'Short 'n Sassy'

Helianthus ‘Autumn Gold’

Helianthus salicifolius 'Autumn Gold'

pp# 30,177 — Autumn Gold Willowleaf Sunflower

24” tall & wide — Exposure: full sun

Glowing masses of bright yellow, daisy-like flowers appear in late summer and continue to early fall. Plants are upright growing with narrow, dark green, leathery leaves. Compared to *H.* ‘First Light’ this selection blooms 4 weeks earlier and is a little more compact.

True 1 gallon

Helianthus ‘Suncatcher’

Helianthus decapetalus 'Suncatcher'

Suncatcher Woodland Sunflower

36-48” tall x 24-36” wide — Exposure: full sun to afternoon shade

A perennial sunflower, Suncatcher brings multitudes of sunny yellow flowers from mid to late summer. It works well in the back or middle of the perennial border, in naturalized areas and in cut flower gardens. It attracts pollinators but is deer and rabbit resistant. aka Forest Sunflower and Ten-Petal Sunflower.

True 1 gallon

Heliopsis ‘Red Oriole’

NEW Heliopsis helianthoides 'Red Oriole'

ppaf — Red Oriole False Sunflower

20-24" tall x 12-18” wide — Exposure: sun

Native to North America, this clumping perennial has dark green, bronze tinged leaves that are covered in an abundance of sunflower-like flowers with bright red, double petals and brown centers. This heavy nectar plant attracts butterflies, bees and other pollinators to the garden. Drought tolerant once established. Attracts seed eating birds.

2 gallon

Hemerocallis ‘Bela Lugosi’

Hemerocallis ‘Calico Jack’

Hemerocallis sp.

Exposure: sun — Daylily

Hemerocallis are selected for their abundance of blossoms, vibrant colors, and hardiness in a variety of climates and soils. These are tough plants that withstand heat, drought, light shade, harsh winters, wild children and hungry animals. Daylilies are a carefree, low maintenance perennial that is excellent for massing, edging, borders, or in containers. They are tolerant of winter salts from sidewalks, driveways, or roads, and they aren’t affected by the juglone of Black Walnut trees. They can easily be divided every few years in fall or early spring.

Hemerocallis are typically classified by the following: bloom period (early vs late), length of time the single flowers are open (8 vs 16 hours), whether it reblooms, state of foliage in the winter (dormant vs evergreen), and number of chromosomes (diploid vs tetraploid). Most plants are diploids but tetraploids tend to be larger, more vigorous varieties. All heights listed are in flower.

‘Bela Lugosi’ - 6", saturated true purple flowers with a bright lime green throat, that are very sunfast for such a dark color. Midseason Bloomer, blooming in mid-July. Semi-evergreen foliage in winter, tetraploid. Introduced in 1995, its parentage is (seedling x Nairobi Night) x tetraploid Grand Masterpiece. Winner of the 2001 AHS Award of Merit. 33” tall x 18-24” wide.

True 1 gallon & 2 gallon

Hemerocallis continued

'Calico Jack' - Early-mid summer brings bright yellow flowers with bold plum edge and eye; large 6" flowers with ruffled edges. Strong tetraploid and semi-evergreen plants have excellent substance. 24-36" tall by 18-24" wide. (photo on previous page)

'Chicago Apache' - 5", intense scarlet red flowers are recurved with a small sulfur yellow watermark and green throat. Petals have loosely ruffled edges, and the sepal edges are slightly crimped. The color is extremely sunfast, too. Late Midseason Bloomer, blooming in late July. Dormant foliage in winter, tetraploid, introduced in 1981. 27-30" tall x 18-24" wide.

'Entrapment' - 6" purple-blue flowers have ruffled petals and a yellow throat. An excellent rebloomer, and a "Super Bloomer" with over 600 flowers per plant after 3 years. Mid-summer bloomer, 24" tall by 18-24" wide.

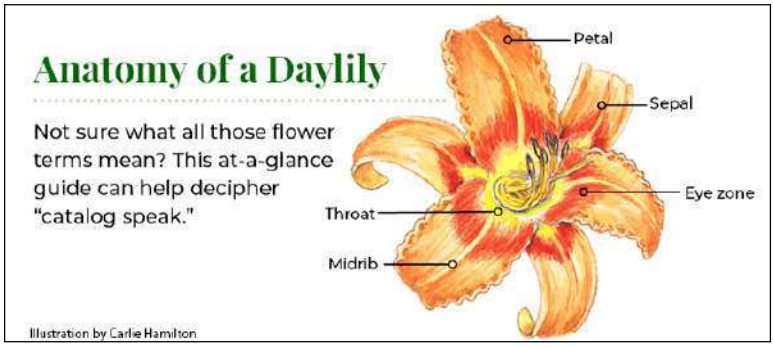

'Gothic Grenadine' - A stunning red variety featuring exceptionally large blooms and a very high bud count. This variety is very vigorous and the flowers have heavy substance and ruffled edges. Late Midseason Bloomer, blooming in late July. Semi-evergreen foliage in winter, tetraploid, 25-28" tall x 18-24" wide.

'Kansas Kitten' - 5" lavender purple flowers with dark purple eyes. Mid season bloomer, blooming in July and a rebloomer, producing a second set of flowers. Dormant foliage in winter, diploid, 22" tall by 18-24" wide.

'Lies and Lipstick' - 5.5" soft white-pink petals with a rose-red eye and green throat. Ruffled, red edges are trimmed in red for and extra touch of flair. Early Midseason Bloomer, blooming in early July and a rebloomer, producing a second set of flowers. Semi-evergreen foliage in winter, tetraploid, 25" tall x 18-24" wide.

'Mighty Chestnut' - Aptly named, it produces 5-5½", russet red-orange (some describe it as chestnut) blossoms with a deep burgundy eye and gold throat atop strong, well-branched and budded scapes. The broad, rounded, ruffled petals open wide to reveal the perfect flower form. It's even fragrant! Late Midseason Bloomer, blooming in late July. Extended bloomer with flowers staying open at least 16 hours. Dormant foliage in winter, tetraploid. 30" tall x 18-24" wide. (photo on next page)

Hemerocallis 'Lies and Lipstick'

'Mighty Chestnut' (listed on previous pg)

Hemerocallis 'Passion for Red'

Hemerocallis 'Persian Ruby'

Hemerocallis 'Red Hot Returns'

Hemerocallis continued

'Passion for Red' - large 6½", fragrant, scarlet red flowers have a deep green throat. Walters Gardens says, "For designers who are particular about their shades of red, this is more of an orange-red than a blue-red." Early Midseason Bloomer, blooming in early July, and a rebloomer, producing a second set of flowers. Semi-evergreen foliage in winter, tetraploid. Introduced in 1994, its parentage is (seedling x tetraploid Super Purple) x (seedling x tetraploid When I Dream). 22" tall x 18-24" wide.

'Persian Ruby' - Deep purplish red, spoon-shaped flowers are massive – nearly 8" across! The large green throat is a nice contrast to the dark petals. Compared to the popular 'Ruby Spider' (listed on the next page), flowers are more purple in color. Early Midseason Bloomer, blooming in early July. Dormant foliage in winter, tetraploid, 30" tall x 18-24" wide. Part of the Proven Winners Rainbow Rhythm series from Walters Gardens.

'Red Hot Returns' - Brilliant cherry red, ruffled blossoms have a brightly contrasting yellow halo and an apple green throat. It's a vigorous variety and produces several flower scapes per fan. Early Mid season Bloomer, blooming in early July. Rebloomer, producing a second set of flowers. Extended Bloomer with flowers staying open at least 16 hours. Semi-evergreen foliage in winter, diploid, 24-28" tall x 18-24" wide.

'Romantic Returns' - A standout reblooming daylily from renowned hybridizer Dr. Darrel Apps! Fragrant, deep rose pink flowers have ruffled petals with notably large flowers for a continuous bloomer at 5" wide. Compared to 'Passionate Returns', this is a deeper pink with larger flowers. Early Midseason Bloomer, blooming in early July. Rebloomer, producing a second set of flowers. Extended Bloomer with flowers staying open at least 16 hours. Semi-evergreen foliage in winter, diploid, 25" tall x 18-24" wide.

'Ruby Spider' - The gigantic 9", dark ruby red flowers are officially classified as "unusual form-spatulate" since the petals are long and spoon-shaped. The petals open very wide and flat, nicely displaying the large, golden yellow throat and matching midribs. Early Bloomer, blooming in June. Dormant foliage in winter, tetraploid. Part of the Proven Winners Rainbow Rhythm series from Walters Gardens. 34" tall x 18-24" wide.

'Singular Sensation' - 6" soft pink flowers with a heavily ruffled gold edge and green throat. Well-branched scapes boast high bud counts. Walters Gardens says "One of our best reblooming varieties with flowers of this size." Early Midseason Bloomer, blooming in early July. Rebloomer, producing a second set of flowers. Semi-evergreen foliage in winter, tetraploid. 26" tall x 18-24" wide.

Hemerocallis 'Singular Sensation'

Hemerocallis continued

'South Seas' - 5", coral-tangerine sepals with a reddish-coral band and yellow throat; very distinctive coloring! Smooth, rounded petals have beautifully ruffled edges. Midseason Bloomer, blooming in July. Rebloomer, producing a second set of flowers. Extended Bloomer with flowers staying open at least 16 hours. Nocturnal, with buds open in late afternoon and remain open through all or part of the next day. Dormant foliage in winter, tetraploid. 30" tall x 18-24" wide.

Hemerocallis 'South Seas'

'Tennessee Volunteer' - large 6-6½" flowers are a shocking, eye-searing orange, with yellow midribs. Late Midseason Bloomer, blooming in late July and early August. 48" tall when in flower, they can be seen from 100 yards away! 48" tall x 30" wide.

'Tennessee Volunteer'

Heuchera & Heucherella

Coral Bells & Foamy Bells

Heuchera and Heucherella are usually densely mounded perennials producing numerous sprays of white, cream, pink, or red flowers from spring well into summer. Breeding has produced a wide range of foliage textures including smooth, wavy, pubescent, crenate, and crinkled. Foliage colors include yellows, reds, pinks, oranges, purples, silvers, ambers, whites, greens, and bicolors. Great in mixed containers, they are showy all year and require very little water or maintenance. Heuchera and Heucherella benefit from well drained soils, partial shade, and have become versatile, well-adapted plants for the Midwest garden. Heights listed are without flowers.

This year we are organizing the plants by breeder and series rather than strictly alphabetically.

Terra Nova Heuchera

Heuchera 'Black Forest Cake'

pp# 33,532 — Black Forest Cake Coral Bells

6-12" tall x 12" wide — Exposure: part shade

Smooth leathery leaves hold their deep chocolately purple color all year round! Like Obsidian, this selection does not color shift throughout the year. It also has short petioles, keeping the plant looking neat and compact. Showy dark red-pink flowers sit atop black stems in late spring to early summer.

True 1 gallon

Heuchera 'Black Forest Cake'

Heuchera Champagne ('TNHEUCHA')

pp# 27,567 — Champagne Coral Bells

10-12" tall x 12-14" wide — Exposure: part shade

The foliage of Champagne turns rosy-amber in early spring, shifts to shades of gold in summer, and then shifts back to rosy-amber in fall. Short, dark burgundy flower stems hold light peach blooms just above the plant in early summer.

True 1 gallon

Heuchera Champagne (spring)

Heuchera 'Fire Alarm'

pp# 24,525 — Fire Alarm Coral Bells

9" tall x 14" wide — Exposure: part shade

Fire Alarm forms a mound of thick, leathery, glossy red leaves. It changes colors throughout the season, with the brightest red color appearing in cooler temperatures. Spikes of white flowers top the plant in summer. Winner of "Best Heuchera in the Shade" in 2012 Ohio State University trials.

True 1 gallon

Heuchera 'Fire Alarm'

Heuchera Forever Purple ('TNHEUFP')

pp# 26,358 — Forever Purple Coral Bells

12" tall x 15" wide — Exposure: part shade

Glossy, purple leaves have black veins and wavy edges. The bright, almost electric color is unlike any other purple heuchera we've grown. Short spikes of purple-pink flowers appear in summer. Forever Purple lives up to its name, providing vivid color all year.

True 1 gallon

Heuchera Forever Purple (year round)

Heuchera Forever Red ('TNHEUFR')

pp# 29,644 — Forever Red Coral Bells

7" tall x 14" wide — Exposure: part shade

Forever Red is touted as having "the reddest leaves ever!". The foliage holds its color all year, but its most vibrant in spring and fall when the temperatures are cooler. White flower spikes appear in late summer.

True 1 gallon

Heuchera Forever Red (spring/fall)

Heuchera ‘Grande Carnelian’

Heuchera ‘Grande Carnelian’

ppaf — Grande Carnelian Coral Bells

18" tall x 28” wide — Exposure: part shade

Oversized ruffled leaves are a rich, reddish bronze color that shimmers like polished stone. Bred for impact as well as exceptional heat tolerance, making it the perfect choice for our hot humid summers.

True 1 gallon

Heuchera ‘Iridescent’

Heuchera ‘Iridescent’

ppaf — Iridescent Coral Bells

12" tall x 24” wide — Exposure: part shade

An absolute new color in Heuchera! Pearly lavender and rose colored leaves are held in a tight mound. Both a blender of colors and a standout, Iridescent lives up to its name! Light pink flowers bloom in late spring and early summer, complementing the soft colors in the leaves. Very sun tolerant and vigorous, too.

True 1 gallon

Heuchera 'Midnight Rose' (spring)

Heuchera 'Midnight Rose'

pp# 18,551 — Midnight Rose Coral Bells

12" tall x 24” wide — Exposure: part shade

The dark, nearly black leaves are covered with hot pink polka dots. The pink spots are small in spring but grow and brighten as the season progresses. A very unique specimen for the shade garden with an unusual variegation pattern, a sport of H. ‘Obsidian’ that was discovered at Behnke Nursery in Maryland. One of the most sun tolerant Heucheras.

True 1 gallon

Northern Exposure Sienna (spring/summer)

Heuchera Northern Exposure Sienna (‘TNHEUNESI’)

pp# 32,044 — Northern Exposure Sienna Coral Bells

12-14" tall x 20" wide — Exposure: part shade

The foliage emerges yellow with orange-red middles, transitions to solid yellow-green in summer and then gets some orange-red color again in the fall. It also has incredibly showy dark pink flowers on red stems. The Northern Exposure series is incredibly cold hardy, bred from the Canada native *H. richardsonii*. It can have some difficulty during especially hot and humid periods of summer, so be sure not to overwater already stressed plants.

True 1 gallon

Heuchera 'Obsidian' (year round)

Heuchera 'Obsidian'

pp# 14,836 — Obsidian Coral Bells

10" tall x 16” wide — Exposure: sun to part shade

The large, smooth, purple-black foliage is so shiny it looks lacquered. Quite popular, it combines very well with lighter colored hostas and silver ferns. A good grower forming a dense mound, it produces small, cream colored flowers that float over the foliage in early summer. We grow Obsidian in full sun, though it has well drained soil and sufficient summer water.

True 1 gallon

Heuchera 'Paprika'

pp# 24,575 — Paprika Coral Bells

8" tall x 16" wide — Exposure: part shade-shade

Described as "the brightest orange heuchera on the market!" Very showy rosy orange foliage in spring and fall, and orange to peach shades the rest of the year. Paprika sports larger, fuzzy leaves due to H. villosa breeding.

True 1 gallon

Heuchera 'Paprika' (summer)

Heuchera 'Paris'

pp #18,881 — Paris Coral Bells

8" tall x 14" wide — Exposure: part shade

Paris continuously sends up fresh stems of large, deep rose flowers, feeding hummingbirds from spring into mid-summer. The leaves are striking, with their whitish green tones and gorgeous green veins. A much prized plant for the garden that will tolerate more sun than most heucheras.

True 1 gallon

Heuchera 'Paris'

Heuchera 'Peach Smoothie'

Peach Smoothie Coral Bells

12" tall x 14-16" wide — Exposure: part shade

A landscape size Coral Bell with a big, bold habit and great heat tolerance. Very large, rounded leaves emerge in spring a glowing berry rose, deepening to cherry-orange with a silver overlay. In early summer, white flowers are borne on tall scapes above the foliage that hummingbirds love to visit.

True 1 gallon

'Peach Smoothie' (spring/summer)

Heuchera 'Rio'

pp# 24,273 — Rio Coral Bells

9" tall x 14" wide — Exposure: part shade to shade

Rio has multi-colored foliage that changes throughout the season. New leaves emerge glossy rose-peach, change to amber, and finally to yellow amber. Very floriferous with outstanding, short spikes of white flowers on red stems in summer.

True 1 gallon

Heuchera 'Rio' (summer)

Heuchera 'Ruby Tuesday'

pp# 33,572 — Ruby Tuesday Coral Bells

14-16" tall & wide — Exposure: part shade to shade

Very ruffled leaves emerge ruby red in spring before maturing to deep merlot with a silver overlay. In late spring to early summer, masses of tiny, white flowers are held above the foliage on tall wands.

True 1 gallon

'Ruby Tuesday' (spring/summer)

Heuchera 'Sugar Plum' (spring)

Heuchera 'Sugar Plum'

pp# 21,857 — Sugar Plum Coral Bells

16" tall x 18" wide — Exposure: part shade

Sugar Plum stands out from other Coral Bells with its bright silver and glowing plum-purple foliage in spring. Summer turns the leaves a unique silver-gray with darker contrasting veins. Silvery pink flowers rise above the foliage on purple stems and sometimes rebloom. A fantastic, vigorous plant that blends together many types and colors of foliage.

True 1 gallon

Heuchera 'Sweet Tart'

Heuchera 'Sweet Tart'

pp# 24,573 — Sweet Tart Coral Bells

5-6" tall x 8" wide — Exposure: part shade

This mini heuchera forms a tight mound of bright, lemon-lime foliage. Dense spikes of contrasting two-toned pink flowers top the plant beginning in late spring. This is one of the best yellows we have found.

Trade 1 gallon

Heuchera 'Testarossa'

NEW Heuchera 'Testarossa'

ppaf — Testarossa Coral Bells

10" tall by 17" wide — Exposure: part shade to shade

Large red leaves on medium-large plants. Testarossa is Italian for red head, and this one is fabulous! It's been trialed for multiple years for performance and hardiness. Stout plants with short petioles gives this plant a taller, mounding look without any steminess.

True 1 gallon

Heuchera 'Topaz Jazz' (summer)

Heuchera 'Topaz Jazz'

pp# 29,354 — Topaz Jazz Coral Bells

14-16" tall & wide — Exposure: part shade to shade

Attractive foliage changes color throughout the year. Leaves begin honey topaz changing to gold, then lime green, all with a strong white veil. Short, maroon stems hold creamy yellow green flowers above the plant from in July and September.

True 1 gallon

Indian Summer Series

14" tall x 18" wide Exposure: light shade to part shade

This series from Innoflora Plant Breeding & Gootjes Allplant, was selected for compact plants with incredibly high sun tolerance, in a gorgeous range colors and foliage texture. The Indian Summers are also proving to be extremely winter hardy here in central Ohio.

'Boysenberry' - glossy, ruffled, orange to mahogany leaves; white flowers in summer.
pp# 28,575

'Cherryberry' - ruffled red leaves; pink buds and creamy white flowers

'Coralberry' - bright, coral-pink ruffled foliage, white flowers in summer.
pp# 28,828

'Gojiberry' - glossy, ruffled leaves in amber, tangerine, and orange; white flowers in summer.
pp# 28,883

Mulberry ('Ifehemul') - rounded, glossy reddish-purple leaves with near black veins; white flowers in summer.
pp# 32,045

'Silverberry' - shiny silver leaves with darker veins and burgundy undersides. Pink flowers in summer.

True 1 gallon & 2 gallon

Heuchera 'Silverberry'

Heuchera 'Gojiberry'

Heuchera 'Boysenberry'

Heuchera 'Coralberry'

Heuchera 'Cherryberry'

Heuchera Mulberry

Heuchera 'Caramel'

Sandrine & Thierry Delabroye Heucheras

Heuchera villosa 'Caramel'

pp# 16,560 — Caramel Coral Bells

12" tall x 18-24" wide — Exposure: part shade-shade

Glowing, orange-yellow leaves form a neat, uniform mound. Caramel is stubborn to flower, but when it does, small, cream colored blooms sit 12-18" above the foliage in early to mid-summer. This selection is adaptable to more sun when compared to other orange-yellow foliaged types. This is our most popular orange and a good choice for decorative containers.

True 1 gallon & 2 gallon

Heuchera 'Guacamole'

Heuchera 'Guacamole'

pp# 28,463 — Guacamole Coral Bells

22" tall x 28" wide — Exposure: part shade-shade

This vigorous selection features fuzzy, extra large, bright lime green leaves that always glow, no matter the season. Part shade will ensure brighter foliage, while full shade will bring more hues of green. White flowers bloom in early summer. Our best selling yellow!

True 1 gallon & 2 gallon

Heuchera 'Lemon Love' (bright shade)

Walters Gardens Heuchera & Heucherella

Heuchera 'Lemon Love'

pp# 31,223 — Lemon Love Coral Bells

12" tall x 28-32" wide — Exposure: part shade

Slightly ruffled leaves change colors depending upon the amount of shade in which it is sited. Bright or dappled shade will produce a brighter yellow color, while more shade results in lime green. Spikes of white flowers bloom in mid-summer.

True 1 gallon

Heuchera 'Timeless Night'

NEW Heuchera 'Timeless Night'

pp# 32,134 — Timeless Night Coral Bells

8-10" tall x 16-18" wide — Exposure: sun to part shade

Timeless Night is a repeat bloomer! Showy pink flowers bloom for 3 months, from July to September. These larger flowers also attract hummingbirds and are great for cutting. Striking, glossy black leaves persist through the winter. Part of the Timeless Collection from Walters Gardens.

True 1 gallon

Heuchera 'Wild Rose'

Heuchera 'Wild Rose'

pp# 29,923 — Wild Rose Coral Bells

10-12" tall x 28-32" wide — Exposure: sun to part shade

Large, scalloped, incredibly glossy leaves are a bold shade of purple. Charcoal veins accent the leaves. Dark stems hold rosy pink calyxes and white flowers. Wild Rose is a larger, vigorous selection with a low mounding habit. Part of the PRIMO series from Walters Gardens.

PW Trade 1 gallon

Heucherella 'Copper King'

pp# 35,191 Copper King Foamy Bells

10-12" tall by 18-20" wide Exposure: part shade

The new leaves of this vigorous cultivar are bright orange with copper red centers and yellow edging. Large leaves measure 5" across with deep dissection for a maple-like appearance. In summer, red stems hold scapes of white flowers. Compared with H. 'Hopscotch', this variety is deeper orange with more defined central patterns and marginal color.

True 1 gallon

Heucherella 'Copper King'

Heucherella 'Pink Fizz'

pp# 26,947 Pink Fizz Foamy Bells

8" tall by 18" wide Exposure: part shade to shade

Pink Fizz features deeply lobed, soft green leaves with heavy wine red veining. It maintains its cool coloring and tight habit all season. Showy pink flowers open from hot pink buds on scapes held above the leaves from early to mid-summer.

True 1 gallon

Heucherella 'Pink Fizz'

The Remainder

Heuchera 'Carnival Peach Parfait'

pp# 24,928 Carnival Peach Parfait Coral Bells

10-12" tall by 12-14" wide Exposure: part shade

A vigorous selection, Carnival Peach Parfait features eye-catching, ruffled, peachy-amber leaves with a silver overlay, darker peach veining, and rosy pink underside. Dainty white flower spikes appear in early summer. From Ball Horticultural Co.

True 1 gallon

'Carnival Peach Parfait' (spring/summer)

NEW Heuchera Eternal Flame ('FJF 1811')

pp# 37,030 Eternal Flame Coral Bells

10-12" tall by 12-14" wide Exposure: part shade

This unique Coral Bells has golden yellow leaves patterned with deep red veining and flush with rich orange. Sprays of bell-shaped pink flowers appear in summer. From Concept Plants, bred by Frederic Lafontaine.

True 1 gallon

Heuchera 'Eternal Flame'

Heuchera Timeless Orange ('Inheutiora')

ppaf Timeless Orange Coral Bells

6-8" tall x 10-12" wide Exposure: part shade

Part of the Heureka series, which were bred for short and compact habits. Timeless Orange has small, unique, waxy, tough leaves which are bright peachy orange in spring, and slowly darken as the summer progresses. By late summer the plant is a mix of light, mid, and dark oranges. Flowers bloom in early summer.

True 1 gallon

Heuchera 'Timeless Orange' (spring)

Hibiscus moscheutos and hybrids

Heat lovers, perennial Hibiscus are slow to emerge in spring, but are vigorous growers in the summer. They will grow best planted in rich soil with lots of water in full sun. Hibiscus provide bold color that is easily seen and appreciated from quite a distance. The large dinner plate sized flowers typically begin to flower in early August and continue for 4 to 8 weeks, depending on the variety and the weather.

Hibiscus ''Airbrush Effect'

Hibiscus 'Airbrush Effect

pp# 29,295 — Airbrush Effect Perennial Hibiscus

42-48" tall x 48-54" wide — Exposure: sun

Large, 8" vibrant pink flowers have a bold red eye. Blooming begins in late July and continues into September. A Walters Gardens introduction.

2 gallon

Hibiscus 'Blackberry Merlot'

Hibiscus 'Blackberry Merlot'

pp# 32,036 — Blackberry Merlot Perennial Hibiscus

48-54" tall x 42-48" wide — Exposure: sun

Near black buds open to become large, 8" deep red flowers. Blooming begins in late July and continues into September. A Walters Gardens introduction.

2 gallon

Hibiscus 'Dark Mystery'

Hibiscus 'Dark Mystery'

pp# 32,036 — Dark Mystery Perennial Hibiscus

60" tall & wide — Exposure: part shade

A long blooming, native perennial hybrid with 8-9" blooms that are white with hints of pink and a red eye that streaks into the petals. It has dark, rich, chocolaty foliage. Blooms mid-summer to early fall. A Walters Gardens introduction.

2 gallon

Hibiscus 'Midnight Marvel'

Hibiscus moscheutos 'Midnight Marvel'

pp# 24,079 — Midnight Marvel Perennial Hibiscus

40-48" tall & wide — Exposure: sun

Large, 8-9" pure red flowers absolutely glow against the purple leaves. The foliage is the darkest of any perennial hibiscus yet. Flowers open over an unusually long time, starting in mid-summer and not quitting until well into fall. A Walters Gardens introduction.

True 1 gallon

Hibiscus moscheutos 'Watermelon Ruffles'

ppaf Watermelon Ruffles Perennial Hibiscus

40-48" tall & wide Exposure: sun

7" magenta pink flowers have heavily ruffled and puckered petals. The brightly colored and textured flowers are set off against a habit of dark green leaves with a bronze cast. A Walters Gardens introduction.

True 1 gallon & 2 gallon

Hibiscus 'Watermelon Ruffles'

HOSTA

Perfect for the beginning gardener, hostas are tough, long-lived plants that perform despite neglect. And, for those of us that love plants, hostas respond wonderfully to amended soils and high fertility, rewarding the attentive gardener profusely. Though not commonly used as such, hostas are a wonderful nectar source for hummingbirds.

We are frequently asked how large a particular hosta will get. The size and growth rate of a hosta greatly depends on sunlight, soil type, moisture, and fertility. The best benchmark for determining how large a hosta will grow is to observe other hostas in the area and compare that to their size categories.

Hosta sizing:

Mini (MN): < 6" tall
Very Small (VS): 6 - 10" tall
Small (S): 11 - 15" tall
Medium (M): 16 - 22" tall
Large (L): 23 - 28" tall
Giant (G): > 28" tall

Hosta 'Abiqua Drinking Gourd'

Abiqua Drinking Gourd Hosta

24" tall x 48" wide Exposure: shade

(L) Heavily puckered blue-green leaves cup dramatically with age; near white flowers in July. Our favorite blue for years, its an outstanding garden performer that gets more majestic every year. Individual leaves are nearly round and can reach 12" across. Eye-catching and truly unique! *H.* 'Toku-dama' x *sieboldiana*. 2014 Hosta of the Year.

Quart Sold in flats of 10 & True 1 gallon

Hosta 'Abiqua Drinking Gourd'

Hosta 'Blue Angel'

Blue Angel Hosta

32" tall x 60" wide Exposure: shade

(G) Large blue-green foliage with heavy substance forms a huge mound up to 60" across when mature; white flowers in July. Good slug resistance. Introduced by Paul Aden in 1986.

Quart Sold in flats of 10 & True 1 gallon

Hosta 'Blue Angel'

Hosta 'Blue Mouse Ears'

Blue Mouse Ears Hosta

4-6" tall x 12" wide Exposure: shade

(MN) Small, rounded, glaucous blue leaves of thick substance. An excellent trough and front of the border specimen. Adorable lavender flowers on short scapes in July. This sport of *H.* 'Blue Cadet' was named 2008 Hosta of the Year.

Quart Sold in trays of 10

Hosta 'Blue Mouse Ears'

Hosta 'Blueberry Muffin'

Blueberry Muffin Hosta

14" tall x 30-36" wide Exposure: shade

(S) Large blue leaves are ridged and puckered in unusual patterns. In summer the foliage turns more green, and lavender flowers form just above the mound. Red petioles add an interest not usually seen on blue hostas. A hybrid of Frances Williams x Fall Bouquet from Bill Meyer.

True 1 gallon

Hosta 'Blueberry Muffin'

Hosta Dancing Darling ('B200')

pp# 30,290

Dancing Darling Hosta

15-20" tall x 24" wide Exposure: part shade to shade

(S) Dancing Darling forms a tidy mound of pointed, deeply veined, brilliant yellow leaves with deep green ruffled edges. This vigorous grower is resistant to sun scorch but should still be sited in part shade to see its best performance. In summer, scapes of pale lavender flowers bloom. A sport of Dancing Queen from Hendrik Jan van den Top of the Netherlands.

Quart Sold in trays of 10 & True 1 gallon

Hosta Dancing Darling

NEW Hosta 'Dancing in the Moonlight'

pp# 35,175 Dancing in the Moonlight Hosta

18" tall x 30" wide Exposure: part shade

(M) Extremely ruffled leaves give this Hosta the impression of "dancing" in the shade garden. Creamy leaf edges fold up to display ruffling that extends from the tip of the leaf down the length of the petiole. Near white flowers first appear in mid-summer. A Walters Gardens introduction.

True 1 gallon

Hosta 'Dancing in the Moonlight'

Hosta 'Dancing Queen'

Dancing Queen Hosta

18" tall x 30" wide Exposure: part shade

(M) Emerges bright yellow and remains yellow all season long, unlike other yellow hostas that emerge or turn chartreuse. The large leaves have a prominent piecrust edge. In mid to late summer, the foliage lightens to soft yellow and is topped with pale lavender flowers. Exhibits great vigor and good sun tolerance. 2020 Hosta of the Year.

True 1 gallon

Hosta 'Dancing Queen'

Hosta 'Dancing with Dragons'

pp# 32,040 Dancing with Dragons Hosta

18" tall x 36-40" wide Exposure: shade

(M) Long, glaucous blue leaves have heavily rippled edges that give the appearance of movement, like its dancing in the garden. The foliage is thickly waxed and retains its striking silvery blue color very late into the season. Near white flowers bloom in late summer. Introduced by Walters Gardens, a complex hybrid, [(Medusa x *H. venusta*) x (Neptune x Fulda)] and [(Neptune x Fulda) x Joy Ride].

Hosta 'Time in a Bottle'

Time in a Bottle Hosta

pp# 33,267

12" tall x 24-36" wide Exposure: part shade to shade

(M) In spring the narrow leaves emerge a glowing golden yellow with a rippled edge. As the season progresses the leaves become more chartreuse in color. Deep purple flowers rise above the leaves in late summer. The showy flowers do not open and persist for an extended duration. Introduced by Walters Gardens, Atom Smasher x Curly Fries hybrid.

Trade 1 gallon

Hosta 'Vulcan'

Hosta 'Vulcan'

Vulcan Hosta

18" tall x 28" wide Exposure: part shade-shade

(M) A vigorous, white-centered sport of Captain Kirk. Contrasting dark green margins and lighter yellow coloring jet towards the white center of each broad, heart-shaped leaf. White scapes carry the light lavender flowers just above the foliage in mid to late summer.

Quart Sold in trays of 10 & True 1 gallon

Hosta 'White Feather'

Hosta 'White Feather'

White Feather Hosta

8-12" tall x 12-24" wide Exposure: part shade

(S) Emerging leaves are almost totally white, slowly developing green streaks until the whole leaf turns green. Spikes of lavender flowers appear in mid-summer. Deep shade can cause decreased vigor due to its lack of chlorophyll in spring. A sport of *H.* 'Undulata' introduced in 2005.

Trade 1 gallon

Hosta 'Wide Brim'

Hosta 'Wide Brim'

Wide Brim Hosta

18" tall x 40" wide Exposure: part shade

(M) Dark to medium green leaves have wide creamy yellow to creamy white margins. Pale lavender flowers appear in mid-summer. A great landscaping hosta because it rapidly makes a very dense and leafy clump. A hybrid of H. 'Bold One' x 'Bold Ribbons' introduced by Paul Aden.

Quart Sold in trays of 10

Iris germanica 'Breakers'

Iris germanica 'Mariposa Autumn'

Iris germanica 'Neptune's Wine'

Iris ensata

Japanese Iris

24-48" tall x 24-28" wide Exposure: full sun

These tall, stately perennials are wonderful plants for average to moist soil conditions, making them wonderful accents for the edge of water gardens. Japanese Iris bloom in early summer, about a month after Siberian Iris.

'Blueberry Pie' - huge, flat, blue-purple flowers with a yellow center

"Eileen's Dream' - large, velvety, dark maroon blooms highlighted by yellow signals, first released in 2000

'Gold Bound' - a tried and true heirloom dating back to 1925. Large pure white flowers are decorated with splashes of gold.

'Harlequinesque' - large white flowers are heavily splashed with fuchsia and adorned with yellow signals, first introduced in 1986

'Variegata' - showy, brightly variegated foliage looks great even when the plants are not in flower. Purple blooms have yellow signals.

Iris ensata 'Harlequinesque'

NEW Iris germanica

Japanese Iris

24-48" tall x 24-28" wide Exposure: full sun

These tall, stately perennials are wonderful plants for average to drier conditions. They do not tolerate wet clay soils, especially over winter. Blooms from late spring to early summer.

'Breakers' - striking, lustrous sapphire blue flowers from late spring to early summer and frequently repeating in the fall

'Mariposa Autumn' - lightly ruffled flowers with white falls, broadly outlined in purple and rosy-violet standards

'Neptune's Wine' - incredibly large velvety flowers that have deep mahogany standards and falls with dark blue beards

'Sharp Dressed Man' - eye catching, bi-color flowers, the falls are a dramatic dark purple with orange beards and violet-purple standards

'Wintry Sky' - bi-color flowers, ruffled blue-violet standards above blue-white falls

True 1 gallon

Iris germanica 'Sharp Dressed Man'

Iris germanica 'Wintry Sky'

Iris s. 'Caesar's Brother'

Iris s. 'Concord Crush'

Iris s. 'Pink Parfait'

Iris sibirica — Siberian Iris

Height: 30-36" Exposure: sun-light shade

A wonderful addition to the garden with their bright green, upright foliage that acts as a soft vertical accent. Flowers are produced in early summer in a wide range of colors including: blue, purple, pink, yellow, and white. Siberian Iris prefer full sun but will tolerate light shade. Native to moist meadows, their thick roots drive down deeply, (which makes them somewhat drought resistant) and great plants for bank stabilization. Siberians are less prone to rot and iris borer than German Iris, and do not need to be divided as often.

'Caesar's Brother' - A very prolific cultivar producing cobalt-blue flowers with bright yellow and white blazes in early summer

'Concord Crush' - large, 6" double, vibrant blue flowers

'Pink Parfait' - Large 7" double, light pink-lavender flowers that look more like a rose than an iris (photo on next page)

True 1 gallon & 2 gallon

Isotoma fluviatilis

Isotoma fluviatilis — Blue Star Creeper

1-2" tall x 24" wide Exposure: sun-shade

Our favorite groundcover! Sun or shade, it's happy either way. This low maintenance, creeping perennial forms a flat carpet of tiny green leaves smothered with starry, soft-blue flowers. Works great between stepping stones, around ponds, or as a lawn substitute. Blooms from spring to fall and is very tolerant of foot traffic.

Quart Sold in trays of 10

Kirengeshoma palmata

Kirengeshoma palmata — Yellow Waxbells

36-48" tall x 48" wide Exposure: light shade-shade

A shrubby looking perennial that is a wonderful addition to the shade garden. Large, maple-like foliage provides an attractive background for the tubular, waxy, bright yellow flowers that hang in loose chains from late summer through fall. Waxbells prefers average soils that are consistently moist.

True 1 gallon

Kniphofia Poker series

Red Hot Poker

Exposure: sun

This tremendously popular series of vigorous Kniphofia from Walters Gardens features huge plants that can not be missed in the garden. Be sure to give these massive perennials plenty of room. In mid-summer, torch-like spikes shoot above the strappy, semi-evergreen foliage. These incredibly floriferous plants bloom for up to 8 weeks! Kniphofia prefer full sun and drier sites. This plant is susceptible to winter root rot if planted in heavy clay soils.

'High Roller' – bicolor flowers are cream and coral orange; 36-48" tall by 24-28" wide
pp# 32,295

'Lady Luck' – bicolor flowers are white and chartreuse; 60-66" tall by 36-42" wide, the largest in the series

Lavandula angustifolia Big Time Blue ('Armtipp01')

pp# 24,827

Big Time Blue English Lavender

12-15" tall x 12-18" wide Exposure: full sun

Larger than average, purple-blue flower spikes rise above fragrant gray-green foliage. Relatively easy to care for, provided it's situated in a sunny and well-drained location, Big Time Blue is an ideal choice for containers, raised beds, and rock gardens. Do not prune in the fall. Lavenders need well-drained soils to grow and over winter.

Trade 1 gallon

Lavandula Big Time Blue

Lavandula ‘Hidcote’

Lavandula angustifolia ‘Hidcote’

Hidcote English Lavender

16-18" tall x 12-15" wide Exposure: full sun

An heirloom perennial from the 1910’s, Hidcote is a compact grower that works very well when sited along the edge of a path where it can be brushed against to release its aromatic scent. One of the hardiest selections, Hidcote produces dark, violet-blue flowers starting in summer. Both flowers and foliage are used for a variety of purposes from arrangements to culinary preparations. Needs well-drained soils to grow and over winter.

Trade 1 gallon & True 1 gallon

Lavandula ‘Munstead’

Lavandula angustifolia 'Munstead'

Munstead English Lavender

12-18" tall x 12” wide Exposure: sun

This incredibly hardy heirloom cultivar was introduced in 1916, Munstead is a classic with its short, compact habit and earlier bloom period from late spring to late summer. Needs well drained soils to thrive and overwinter. Do not prune in fall.

Trade 1 gallon & True 1 gallon

Lavanadula ‘Exceptional’

Lavandula x intermedia Exceptional (‘Hillav’)

pp# 35,846

Exceptional Lavender

10-12" tall & wide Exposure: sun

Exceptional is a spectacular lavender bred for hardiness, drought and heat resistance, and long blooming period from mid-summer to early autumn. Tall flower spikes host dense, pure white flowers that rise above broad, thick, silver-green leaves. Performs best in full sun and well-draining soils.

Trade 1 gallon & True 1 gallon

Lavandula Phenomenal

Lavandula x intermedia Phenomenal ('Niko')

pp# 24,193

Phenomenal Lavender

24-32" tall x 48” wide Exposure: full sun

Phenomenal lives up to its name! This hybrid lavender features great tolerance to extreme heat, cold, humidity, and common diseases. Larger than average, Phenomenal forms a very uniform, dense mound of silvery green foliage topped in mid to late summer with tall wands of rich lavender purple flowers. Great used as a low hedge. Do not prune in fall. Performs best in full sun and well-draining soils.

Trade 1 gallon & True 1 gallon

Lavandula Platinum Blonde

Lavandula angustifolia Platinum Blonde ('Momparler')

pp# 23,834

Platinum Blonde English Lavender

16-24" tall x 18” wide Exposure: full sun

Platinum Blonde features unique, variegated, needle-like foliage that is aromatic and evergreen. Fragrant blue-purple flowers bloom in summer. Does best in drier soils and full sun. Do not prune in the fall.

Trade 1 gallon

Lavandula x intermedia Sensational ('Tesseract')

pp# 31,786

Sensational Lavender

24" tall & wide Exposure: full sun

This sport of Phenomenal has huge flowers and broad, thick, bright silver leaves. Four inch long flower spikes are densely packed, and plants are long blooming, especially if dead-headed. Compared to its parent, Sensational is more compact with thicker foliage, larger flowers, and slightly less fragrance. Do not prune in fall. Performs best in full sun and well-draining soils.

Trade 1 gallon

Lavandula Sensational

NEW Leucanthemum 'Banana Cream II'

pp# 33,851

Banana Cream Shasta Daisy

36" tall x 24-36" wide Exposure: sun-light shade

This prolific blooming daisy from Walters Gardens has 4" wide, lemon yellow flowers that mature to creamy white. The plants are strong growing with a compact habit 15-18" tall. It is a wonderful cut flower with a long vase life. Flower color is best when plants are grown in afternoon shade.

True 1 gallon

Leucanthemum 'Banana Cream'

Leucanthemum 'Becky'

Becky Shasta Daisy

36" tall x 24-36" wide Exposure: sun-light shade

In our opinion, Becky is still the best daisy around, producing masses of large, single white flowers with a yellow cone from June to September. It brings strong sturdy stems and great durability to the garden. It's a great cut flower and will re-bloom well with deadheading. Wonderful for the beginning gardener because it's sure to grow! Perennial of the Year for 2003.

True 1 gallon

Leucanthemum 'Becky'

Leucanthemum 'Goldfinch'

pp# 24,499

Goldfinch Shasta Daisy

19-24" tall x 20" wide Exposure: sun-light shade

Long blooming and compact with semi-double flowers, Goldfinch is the yellowest Leucanthemum on the market! Beautiful, semi-double flowers, change very slowly from bright, saturated lemon yellow to an ivory white. Compared to Banana Cream, it has fuller, darker yellow and longer lasting flowers. From Terra Nova Nurseries.

True 1 gallon

Leucanthemum 'Goldfinch'

Leucanthemum 'Snowcap'

Snowcap Shasta Daisy

8-12" tall & wide Exposure: sun-light shade

Snowcap produces an abundance of large, single, pure white flowers with a yellow cone in June and July. Asexually produced for a very uniform crop of compact, bushy plants. Despite recent introductions, Snowcap is still our favorite dwarf daisy because of its uniformity, reliable flowering, tight habit, and durability in the landscape.

True 1 gallon

Leucanthemum 'Snowcap'

Liatris microcephala

Liatris microcephala

Dwarf Blazing Star

18-24" x 8-12" wide Exposure: sun

This Appalachian native has dark green, shiny, grass-like leaves and produces multiple spikes of rose-purple flowers in August and September, when the summer garden is starting to wane. Easy to grow, trouble free, and drought tolerant once established. Plants have a tendency to flop under the weight of their open flowers, so this liatris benefits from being planted closely to neighboring perennials that can provide support. You can also prune off the flowers to force shorter, more numerous flower spikes.

Trade 1 gallon

Liatris spicata ‘Floristan White’

Liatris spicata 'Floristan White'

Floristan White Blazing Star

3-4' tall x 16-20" wide Exposure: sun

A wonderful native and a staple cut flower, Liatris are one of the few plants whose flowers open from the top, down (determinate flowering). Floristan White produces multiple spikes of clean white flowers that are perfect vertical accents in arrangements and the garden. Dark green, grassy foliage.

2 gallon

Liatris spicata 'Kobold' Original

Liatris spicata 'Kobold' Original

Kobold Blazing Star

18-24" tall x 16-20” wide Exposure: sun

This is the original strain from Holland maintained true to form by division to ensure uniform dwarf plants. A native to Ohio, Liatris have dark green, grassy foliage and produce multiple spikes of rose-purple flowers in June. Although native to moist meadows, this plant adapts wonderfully to average, even dry soils.

True 1 gallon

Ligularia ‘Big Green Tractor’

NEW Ligularia ‘Big Green Tractor’

pp# 35,810

Big Green Tractor Leopard Plant

30-40" tall x 48" wide Exposure: shade

This giant for the shade garden is native to boggy soils, perfect for damp locations, as well as average garden conditions. Huge, ragged-edged leaves up to 16" across contrast wonderfully with other shade plants. In summer, golden-yellow, daisy-like flowers on tall stems rise above the massive leaves.

True 1 gallon

Ligularia ‘Midnight Lady’

Ligularia dentata ‘Midnight Lady’

Midnight Lady Leopard Plant

36-40" x 30-36” wide Exposure: shade

Broad, glossy, dark purple leaves make an extremely bold statement in the garden. With more shade, the foliage will take on more of a green tint. In late summer, golden yellow, daisy-like flowers are perched atop purplish-black stems. Requires consistently moist soil.

Trade 1 gallon & True 1 gallon

NEW Ligularia stenocephala 'The Rocket'

Little Rocket Leopard Plant

36-48" tall x 24" wide Exposure: shade

This striking perennial boasts large, heart shaped leaves with jagged edges. Golden-yellow, daisy-like flowers on tall spikes adorn the plant in mid to late summer and attract butterflies. This is a large plant that requires a shaded garden and plenty of moisture. Perfect for the edge of the pond, looking wonderful with astilbe and hostas.

True 1 gallon

Ligularia 'Little Rocket'

Lobelia x speciosa Starship series

Cardinal Flower

20-24" x 12-18" wide Exposure: full sun

Cardinal Flowers are excellent border plants for moist locations. The Starship series flowers earlier and has better branching than older selections. The rich green foliage remains attractive throughout the growing season. L. x speciosa covers plants developed from crossing L. cardinalis, fulgens, and siphilitica.

Starship Blue ('PAS1302712') - saturated, deep purple-blue flowers

Starship Rose ('PAS1302714') - intense rose-pink flowers on dark stems

Starship Scarlet Bronze Leaf ('PAS1302716') - vibrant, scarlet red flowers on dark stems above dark bronze foliage; 24-28" tall

Cat's Meow Catmint

16-20" tall x 24-36" wide Exposure: sun

Cat's Meow has a shorter, neater habit than traditional Catmints. Its flower spikes are thick and sturdy with larger blue-violet flowers rising above fuzzy, fragrant gray-green foliage. From Walters Gardens.

PW Trade 1 gallon

Nepeta x faassenii Junior Walker ('Novanepjun')

pp# 23,074 — Junior Walker Catmint

18" tall x 18-24" wide — Exposure: sun

Junior Walker Catmint is an excellent, fast growing groundcover with aromatic, gray-green foliage. Plants are covered with small blue flowers from May to August. It responds well to shearing in mid-summer, which promotes repeat blooming and a tighter habit. Tolerant of low fertility and drought. Junior Walker is a sterile, dwarf, compact form of N. 'Walker's Low'.

True 1 gallon

Nepeta Junior Walker

Nepeta kubanica Neptune ('Bokratune')

pp# 29,556 — Neptune Dwarf Catmint

8-12" tall x 8" wide — Exposure: sun

Neptune is an upright, mounded perennial with aromatic, bright green foliage. Plants are covered with large spikes of blue flowers all summer. Neptune is completely different then typical gray leaved catmint. It is strongly upright, doesn't flop, large flowering, hardy, and easy to grow. It responds well to light shearing after the first flush of flowers to promote repeat blooming. Tolerant of low fertility and drought.

True 1 gallon

Nepeta Neptune

Nepeta 'Picture Purrfect'

pp# 34,502 — Picture Purrfect Catmint

10-12" tall x 22-24" wide — Exposure: sun

This dwarf catmint has a short yet broad habit. The compact plants bloom all summer long. Its flowers are noticeably larger and have a bluer tone than Walker's Low. A Walters Gardens introduction.

True 1 gallon

Nepeta 'Picture Purrfect'

Nepeta subsessilis Prelude Purple

pp# 33,997 — Prelude Purple Japanese Catmint

28-36" tall x 24-30" wide — Exposure: sun

From Darwin Perennials, the Prelude Series consists of larger, more upright Japanese Catmint. Plants flower for months, from late spring through summer. If plants begin to look tired in July or August, they can be pruned back hard to rejuvenate the leaves. The fragrant foliage deters deer and rabbits but may attract the occasional cat. Prelude Purple has large blue-purple blooms in loose spikes.

True 1 gallon

Nepeta Prelude Purple

Nepeta x faassenii 'Walker's Low'

Walker's Low Catmint

24" tall & wide — Exposure: sun

Clothed in aromatic, gray-green foliage, spikes of lavender-blue flowers are produced from May to August. Though not growing very low, this tough perennial really performs in hot, dry sites. It can rebloom until fall when grown under good conditions and sheared to remove spent flowers. Makes an excellent, fast growing groundcover. Perennial of the Year for 2007.

True 1 gallon

Nepeta 'Walker's Low'

Oenothera b. Twilight

Oenothera berlandieri Twilight ('Turner01')

pp# 17,230 — Twilight Evening Primrose

10-12" tall x 18-24" wide — Exposure: full sun

This sport of *O.* 'Siskiyou' is covered in mauve-pink flowers throughout early summer. New growth emerging in the spring appears deep purple, but during the warmer months, it changes to green with a purple mid-vein. This variety over winters best in drier soils.

True 1 gallon

Oenothera p. 'Yella Fella'

Oenothera pilosella 'Yella Fella'

Yella Fella Prairie Sundrops

12-16" tall & wide — Exposure: full sun

A great groundcover with bright yellow flowers on tall stems in June, they will re-flower if trimmed back early. The foliage is a rich green and disease resistant. The plants over winter as semi-evergreen basal rosettes that have a good red fall color.

True 1 gallon

Penstemon 'Blackbeard'

Penstemon 'Blackbeard'

pp# 30,052 — Blackbeard Beardtongue

28-34" tall (in flower) x 24-36" wide — Exposure: full sun

This hybrid Penstemon features purple leaves that hold their dark color all season, rather than turning green. Its sturdy stems help the plant stand tall, with no need for staking. In early summer, spikes of tubular lilac-purple flowers rise above the foliage. A Walters Gardens Introduction.

True 1 gallon & 2 gallon

Penstemon 'Dark Towers'

Penstemon 'Dark Towers'

pp# 20,013 — Pocahontas Beardtongue

36" tall (in flower) x 24-36" wide — Exposure: full sun

Dark, wine-red leaves keep their deep color all season, rather than turning green. Its sturdy stems help the plant stand tall, with no need for staking. In early summer, spikes of tubular pale pink flowers appear. An improvement of Husker's Red, Dark Towers has a darker leaf color that holds through the season, has pink flowers rather than white, and is slightly taller. Developed and introduced by Dale Lindgren at the University of Nebraska.

True 1 gallon

Penstemon 'Pocahontas'

Penstemon digitalis 'Pocahontas'

pp# 24,804 — Pocahontas Foxglove Beardtongue

36-48" tall (in flower) x 24-36" wide — Exposure: sun - light shade

Dark burgundy stems and leaves hold their color all season. In late spring to early summer, spikes of light lilac-pink tubular flowers rise above the plants. *P. digitalis* prefers average to dry sites. Wet winter roots will not be appreciated.

True 1 gallon

Penstemon barbatus 'Prairie Dusk'

Prairie Dusk Beardtongue

18-24" tall x 15-18" wide Exposure: full sun

Showy spikes of dusky lilac-purple, trumpet-shaped flowers rise above low clumps of deep green foliage in late spring and early summer. Basal foliage remains evergreen through the winter.

True 1 gallon

Penstemon 'Prairie Dusk'

Penstemon x mexicali

Mexican Beardtongue

Exposure: full sun

These long blooming hybrids produces an abundance of tall, showy spikes of bright, tubular, bell-shaped flowers that are very attractive to butterflies and hummingbirds. Waxy green foliage stays lush through the heat of summer. Penstemon thrive in average and well-drained garden conditions, and are very drought tolerant once established. Deadheading will encourage frequent re-bloom. Song birds love the seeds in fall and winter. A flowering machine that gives perpetual color in the perennial border, mixed containers, etc. Both varieties below are Plant Select Introductions.

Pikes Peak Purple ('PO07S') - tall showy spikes of grape jelly colored flowers with striped throats, 24-30" tall by 18" wide

Red Rocks ('PO08S') - tall showy spikes of bright rose-pink flowers, 18-24" tall by 12-18" wide

True 1 gallon

Penstemon x mexicali Red Rocks

Perovskia atriplicifolia 'Blue Jean Baby'

pp# 29,281

Blue Jean Baby Russian Sage

28-34" tall x 36" wide Exposure: sun

This large bushy plant has gray-green foliage that is aromatic if bruised. The lavender blue flowers are held in sprays above the foliage beginning in mid-summer. This variety is one of the earliest blooming Perovskia. Requires full sun and well drained soils to look its best.

True 1 gallon

Perovskia 'Blue Jean Baby'

Perovskia atriplicifolia 'Prime Time'

pp# 34,304

Prime Time Russian Sage

30-36" tall x 24-30" wide Exposure: sun

Slow to start in the spring, Prime Time will bloom from July into October. The calyxes holding the blue flowers are a dusky purple and remain colorful well into late fall, giving the appearance of blooms. Considered an improvement of Rocketman, with denser flower spikes that flower earlier.

True 1 gallon

Perovskia 'Prime Time'

Phlox paniculata Flame Coral

Phlox paniculata

Tall Garden Phlox

Exposure: sun to light shade

Brightly colored Tall Garden Phlox are a staple plant in the perennial garden. Their sweetly fragrant flowers are loved by hummingbirds and butterflies. They prefer fertile garden soils with good moisture. Plants should be well spaced for air circulation to help prevent disease issues.

Flame Series
Compact, disease resistant and naturally dwarf. All varieties grow 18-24" tall by 18" wide.

Flame Coral ('Barsixtytwo') - dramatic, bright coral flowers
pp# 22,234

'Flame Light Blue' - soft, light blue flowers with pale lavender center
ppaf

Flame Purple ('Barfourteen') - purple flowers with darker eyes (photo on next page)
pp# 22,211

Platycodon 'Astra Pink'

'Sentimental Blue'

'Twinkle White'

Polygonatum commutatum

Polygonatum commutatum — Giant Solomon's Seal

3-5' tall by 12-18" wide Exposure: light shade-shade

The graceful, arching stems of Solomon's Seal add an architectural element that's difficult to achieve with other plants. Stiff, upright, 3-5' tall stems produce dangling white flowers in late spring attracting hummingbirds. In fall, foliage turns golden yellow and flowers are replaced by blue-black berries. Beautiful in the shade garden, combining well with ferns and Hosta of all kinds. Plants are long-lived and carefree.

True 1 gallon

Polygonatum humile

Polygonatum humile — Dwarf Solomon's Seal

4-6" tall, slowly spreading Exposure: part to full shade

Dwarf Solomon's Seal is an upright perennial with glossy, dark green foliage that makes a great groundcover for the shade. Tiny white flowers in early May hang like bells from the leaf axils. Golden yellow fall color. Much more durable than it appears. It's a good cut flower for miniature arrangements. Difficult to locate in the trade.

Quart Sold in trays of 10

Polygonatum multiflorum

Polygonatum multiflorum — Solomon's Seal

24-36" tall x 10-12" wide Exposure: part to full shade

A gracefully arching perennial with blue-green foliage that imparts wonderful structure to the shade garden combining well with ferns and Hosta of all kinds. In May small white flowers, in cluster of 5-7, hang like bells from the leaf axils all up the stem. The hummingbirds love this plant. They work their way up the stems, patiently visiting each flower. A vigorous growing selection. Golden-yellow fall color. Plants are long-lived and carefree.

True 1 gallon

Polygonatum 'Variegatum'

Polygonatum odoratum 'Variegatum' — Variegated Solomon's Seal

24-30" tall & wide Exposure: light shade-shade

Variegated Solomon's Seal is a graceful plant with white edged green leaves on arching stems. Small white flowers in May hang like bells from the leaf axils. This is a great plant to lighten up a shady area and to add a unique arching structure. A slow growing spreader, but well worth the wait! Perennial of the Year for 2013.

True 1 gallon

Pulmonaria 'Diana Clare'

Pulmonaria longifolia 'Diana Clare' — Diana Clare Lungwort

8-12" tall x 12-18" wide Exposure: part shade-shade

This tried and true selection was discovered in the UK in 1995 by Bob Brown, who loved the plant so much he named it after his wife. In very early spring dark violet flowers shift to cobalt blue and sometimes pink, over long, pointed apple green leaves that look like they've been frosted. The tough foliage holds strong even in the heat of the summer.

True 1 gallon

Pulmonaria 'Lisa Marie'

pp# 31,226 — Lisa Marie Lungwort

15-18" tall x 18-24" wide — Exposure: part shade-shade

Lisa Marie has huge raspberry pink flowers that cover the plant in early spring, when most perennials are still asleep. The leaves are a rich dark green with silver spotting, adding interest and contrast in the summer even after it's done flowering. Compared to Raspberry Splash, Lisa Marie is a larger plant overall.

True 1 gallon

Pulmonaria 'Lisa Marie'

Pulmonaria 'Samouri'

Samouri Lungwort

8-12" tall x 12-14" wide — Exposure: part shade to shade

Samourai Lungwort has pinkish blue buds that open to reveal cobalt blue tubular flowers, blooming in early spring before the mature leaves fully expand. The brilliant silver, lightly mottled leaves easily brighten up a shady location. Mildew resistant and very tolerant of heat and humidity.

True 1 gallon

Pulmonaria 'Samouri'

Pulmonaria 'Shrimps on the Barbie'

Shrimps on the Barbie Lungwort

10" tall x 24" wide — Exposure: part shade to shade

Bright pink flowers cover the plants in early spring, when most perennials are still asleep. The flowers hold their pink color rather than shifting like most Lungwort. The crisp apple green foliage with bright white spotting adds interest and contrast in the summer even after it's done flowering.

True 1 gallon

Pulmonaria 'Shrimps on the Barbie'

Pulmonaria 'Trevi Fountain'

Trevi Fountain Lungwort

12" tall x 18" wide — Exposure: part shade-shade

A fantastic groundcover for the shade garden, Trevi Fountain produces abundant clusters of cobalt-blue flowers in early spring that mature to pink before dropping. Its dark green leaves are heavily spotted and hold up very well throughout the summer. This has been our favorite Pulmonaria variety for persistence, vigor and flower color since 2000.

True 1 gallon

Pulmonaria 'Trevi Fountain'

Rodgersia aesculifolia 'Irish Bronze'

Irish Bronze Rodger's Flower

3-5' tall by 2-3' wide — Exposure: full shade

A specimen plant for the shade garden that provides lush, tropical-looking leaves, particularly around a stream, lake, or water feature. Finger-like foliage emerges green in spring, maturing to green with a bronze cast. Pale pink, waxy-looking flowers are borne in huge panicles in late spring to mid-summer.

True 1 gallon

Rodgersia 'Irish Bronze'

Rodgersia ‘Elegans’

Rodgersia pinnata ‘Elegans’ — Featherleaf Rodger's Flower

36-48” tall & wide Exposure: full shade

A large perennial that creates a unique architectural feature, particularly along a stream, lake or water feature. Pinnately compound foliage emerges in the spring with a slight bronze cast, maturing to rich green. White to light pink, apetalus flowers are borne in large panicles on tall stems in late spring to mid-summer. It will perform adequately in average garden soils but will flourish in rich, moist soils and partial shade. Will not tolerate dry soil.

True 1 gallon

Rodgersia ‘Saarbrucken’

NEW Rodgersia podophylla ‘Saarbrucken’ — Saarbrucken Rodger's Flower

36” tall x 24-36” wide Exposure: full shade

Finger-like, tropical looking leaves emerge light green in spring and mature to glossy bronze to maroon for the summer. Creamy white to pale pink flowers are produced on 12" long panicles in late spring to mid-summer. Rodgersia provide lush, tropical looking foliage particularly around a stream, lake or water feature.

True 1 gallon

Rudbeckia ‘American Gold Rush’

Rudbeckia fulgida var. deamii 'American Gold Rush'

pp# 28,498 — American Gold Rush Black-eyed Susan

24” tall x 36” wide Exposure: full sun

American Gold Rush features 2” wide, classic black-eyed susan flowers above foliage that is more similar to Viette’s Little Suzy. The narrow hairy foliage forms a compact, dome-shaped habit. This new variety is touted as being resistant to Septoria leaf spot (the blackish-purple lesions that infect the leaves of Goldsturm). 2020 AAS Perennial Award Winner.

True 1 gallon

Rudbeckia 'Goldsturm'

Rudbeckia fulgida var. sullivantii 'Goldsturm' — Goldsturm Black-eyed Susan

24-36” tall x 24” wide Exposure: sun-light shade

Possibly one of the most well known of our native prairie plants, with its flashy, golden yellow, daisy-like flowers and black cones. Flowering profusely in July and August, Goldsturm combines well with grasses, Penstemon, and Leucanthemum. PPA Perennial of the Year in 1999.

True 1 gallon

Rudbeckia 'Herbstsonne'

Rudbeckia laciniata 'Herbstsonne' — Autumn Sun Black-eyed Susan

5-7' tall x 2-3' wide Exposure: sun-light shade

A statuesque native prairie plant that is a butterfly and goldfinch magnet. Large, waxy green leaves are topped with loose clusters of bright yellow flowers in August through September. Prefers moist, rich soils but is very adaptable. Combines very well with other natives like Panicum and Eupatorium.

2 gallon

Rudbeckia f. var. sp. 'Viette's Little Suzy'

Viette's Little Suzy Black-eyed Susan

18-24" tall by 12-16" wide Exposure: sun to light shade

Deep golden yellow flowers are produced from late summer into fall. Shorter in stature, it is well suited for today's smaller landscape. An under used Black-eyed Susan that typically begins to flower 4 weeks before Goldsturm with more lanceolate foliage and a less vigorous growth rate.

True 1 gallon

Rudbeckia
'Viette's Little Suzy'

Rudbeckia maxima

Great Coneflower

6-7' tall by 2' wide Exposure: sun

Not for the faint of heart or a small garden. Huge, powder-blue leaves of basal foliage from which towering flower spikes soar in June and July. Flowers stems are covered with bright lemon-yellow flowers that are loved by butterflies and birds. It prefers moist, open areas and withstands hot, humid summers easily. Wonderful with other prairie natives.

2 gallon

Rudbeckia
maxima

Salvia sp.

Garden Sage

Exposure: sun-light shade

Garden sages are easy to grow perennials that thrive with minimum care. They prefer full sun to part shade and well drained soil, are insect and disease resistant, and have a long flowering duration. Flowers are held in upright spikes above the foliage from May to mid-summer. Prune in half after the first flush of flowers for denser habit and cleaner re-bloom.

April Night

'Bumbleblue'

April Night ('DSALRS203') - vivid, violet-blue flowers, blooms about a month earlier than May Night; 12-14" tall by 18-20" wide. From Danziger Flower Farm.
pp# 26,520

'Bumbleblue' - loads of saturated violet blue flowers on petite plants, 12-14" tall by 14-16" wide, from Walters Gardens
pp# 30,084

'Salute Neon Pink'

Sanguisorba hakusanensis — Lilac Squirrel Burnet

24-36" tall by 24" wide Exposure: sun

Lilac Squirrel is undoubtedly one of the most beautiful botanical burnets. The fresh green color of the leaves highlights a frothy flowering in the form of trailing pinkish-blue 5" long catkins fading into a lovely lilac tone. Blooms from July to September. A beautiful species to display in the center of a flower bed or container.

True 1 gallon

Sanguisorba hakusanensis

Sanguisorba 'Plum Drops'

ppaf — Plum Drops Great Burnet

8" tall by 15" wide Exposure: sun

Plum Drops creates a striking presence in the garden. The dark green leaves stays low to the ground, providing a lush base for the fluffy, plum-colored flowers that bloom heavily throughout the season on long wiry stems. Blooms in late summer into early fall and gardeners appreciate its "see-through" quality.

True 1 gallon

Sanguisorba 'Plum Drops'

Scabiosa caucasica 'Fama Deep Blue' — Fama Deep Blue Pincushion Flower

18-24" tall x 12-18" wide Exposure: sun to part shade

Fama Deep Blue sports the largest blooms of any Pincushion Flowers, up to 4" across! The double, periwinkle-blue flowers bloom all summer, especially if dead-headed. The plant structure is a bit scraggly, but the large beautiful blooms make up for what the foliage lacks. Grow tightly amongst companion plants to mask the leaves and support the beautiful flowers on their tall stems. Good winter drainage is essential for overwintering.

True 1 gallon

Scabiosa 'Fama Deep Blue'

Scabiosa columbaria — Pincushion Flower

12-15" tall x 10-12" wide Exposure: sun

Pincushion Flowers have a long and profuse bloom period, starting in late April and continuing until frost. Flowers are held above the low foliage on wiry stems. A short lived perennial with ferny, gray-green foliage. It likes full sun and average to low water. Good drainage is essential for overwintering success. Deadhead for a cleaner appearance.

'Butterfly Blue' - lavender-blue flowers, PPA Perennial of the Year in 2000

Flutter Rose Pink ('Balfluttropi') - large pink flowers; compact foliage
pp# 27,809

Flutter Rose Pink

Sedum 'Firecracker'

Sedum 'Firecracker'

Firecracker Stonecrop

pp# 26,595

Height: 4-6" Exposure: sun

This low growing sedum has striking ruby red foliage that is covered in large clusters of hot pink flowers for up to 6 weeks in August and September.

Trade 1 gallon

Sedum 'After Dark'

Upright Sedum sp.

Stonecrop

Exposure: sun

Like the groundcover types, upright sedums come in many varieties, with foliage color ranging from deep purple to light green. Typically the flowers are a shade of light pink to brick red. Sedums thrive in dry areas with low fertility. Over watering during the growing season or siting in an area with soggy winter soils will result in death.

'After Dark' - leaves are near-black, with the summer sun bringing out the pp# 35,965 darkest color. In fall, clusters of black buds will open to garnet red flowers. 18-20" tall by 24-28" wide

'Frosted Fire'

'Mojave Jewels Sapphire'

'Frosted Fire' - leaves edged in white to cream; a variegated sport of Autumn Fire. 24-30" tall by 18-24" wide.

'Mojave Jewels Sapphire' - emerges dusky blue-purple in spring, transition- ppaf ing to deep purple in the heat of summer. In late summer, large clusters of purple buds open to display rosy pink flowers. 12-16" tall x 18-20" wide

spectabile 'Neon' - selected from a block of Sedum 'Brilliant'. Its intense, vibrant, rose-pink flowers stood out from the rest being much brighter than its parent. 24" tall x 12-15" wide.

'T-Rex' - selected here at Smith's Gardens from a block of *Sedum* 'Autumn Joy'. Its leaves are heavily toothed and cupped, giving the plant much more textural interest. This selection is more resistant to stem rot, making it easier to grow and/or hold in a container. The flower color, the same as Autumn Joy, is a nice mid-pink. 24" tall x 12-15" wide.

Trade 1 gallon & True 1 gallon

Sedum 'T Rex'

Solidago Little Lemon

Solidago Little Lemon ('Dansolitlem')

Little Lemon Goldenrod

pp# 17,297

12-15" tall & wide Exposure: full sun to bright shade

The most compact, dwarf yellow Solidago to date, Little Lemon is well branched and blooms in mid-summer. Also worthy of noting: the pollen of Goldenrod is too heavy to be blown by the wind, rather it falls to the ground, so it doesn't cause allergies.

True 1 gallon

Stachys byzantina 'Fuzzy Wuzzy'

Fuzzy Wuzzy Lamb's Ear

8-12" tall by 24" wide Exposure: sun to light shade

Small, silvery white, fuzzy leaves form a quickly spreading mat. Flower stalks appear in mid-summer, but are usually removed to keep the plant neat and short. Some summer die-out may occur in wet soils or during humid summers. The leaves of Fuzzy Wuzzy are smaller than Helen von Stein (listed next) but the mature plant size is the same.

Trade 1 gallon

Stachys 'Fuzzy Wuzzy' in bloom

Stachys byzantina 'Helen von Stein'

Big Ears Lamb's Ear

8" tall x 24" wide Exposure: sun-part shade

Large, thick, soft, velvety leaves makes this plant irresistible! This Lamb's Ear forms a quickly spreading mat, 8" tall. Flower stalks appear in mid-summer, but are usually removed by gardeners to keep the plant neat and short. Some summer die-out may occur in wet soils or during humid summers. Also known as Big Ears.

True 1 gallon

Stachys 'Helen von Stein'

Stachys minor (S. minima)

Dwarf Betony

8" tall & wide Exposure: sun-shade

Short, dense, upright spikes of vibrant pink flowers are produced in late June and July. Glossy, waxy, crenate, dark green foliage is resistant to burn and wilt in summer and is semi-evergreen in winter. Attractive seed heads are held from late summer into early spring of the following year. Grows 8" tall in full sun or shade. This easy to grow perennial is perfect for the front of the border or as an edging plant.

Trade 1 gallon

Stachys minor

Stachys monnieri 'Hummelo'

Hummelo Betony

18-24" tall x 18" wide Exposure: sun-shade

Similar to *Stachys officinalis* but with slightly longer glossier leaves, flowers 2-3 weeks earlier, and has narrower flower spikes. Flowers are an outstanding shade of dark, saturated pink, starting in mid-summer. The flower color is darker than *S. officinalis*, but a bit less floriferous. Semi-evergreen with showy seed stalks in winter.

True 1 gallon

Stachys 'Hummelo'

Stachys officinalis 'Pink Cotton Candy'

pp# 21,436

Pink Cotton Candy Betony

24" tall x 16-20" wide Exposure: sun to part shade

The bright evergreen leaves of Pink Cotton Candy have attractively scalloped edges. Large, cotton candy pink flowers cover the foliage in June and July. Selected by the Chicago Botanical Garden, this easy to grow perennial thrives in sun or shade and is perfect for the garden.

True 1 gallon

Stachys 'Pink Cotton Candy'

Stokesia 'Honeysong Purple'

Stokesia laevis 'Honeysong Purple'

Honeysong Purple Stokes' Aster

12-14" tall x 15" wide Exposure: sun to light shade

Honeysong Purple is a wonderful Stokesia producing large, 3" diameter, intense royal purple flowers in summer. The plants have short, strong, stems that hold the flowers uniformly above the foliage. Deep green foliage is free of insect or disease problems and has a neat mounded habit. The seed heads are quite attractive and extend interest into the fall. Native to the Southeastern USA.

True 1 gallon & 2 gallon

Stokesia 'Peachie's Pick'

Stokesia laevis 'Peachie's Pick'

Peachie's Pick Stokes' Aster

18" tall & wide Exposure: sun to light shade

Peachie's Pick blooms are up to 3" across and a lovely lavender-blue. They flower later than other Stokes' Asters, extending the season for this colorful perennial. Its strictly upright habit and soft, mid-blue flowers differentiate this selection from others. The seed heads are quite attractive and extend interest into the fall. Native to the Southeastern USA.

ppaf

Whitecaps Stokes' Aster

24-26" tall by 32-36" wide Exposure: sun to light shade

A wonderful Stokes' Aster producing large, 3" diameter, near white flowers with a hint of blush pink. Flowers open in summer on short strong stems, sitting just above the leathery, dark green leaves. The seed heads are quite attractive and extend interest into the fall. Native to the Southeastern USA.

Proven Winner True 1 gallon

Tanacetum 'Robinson's Red'

Tanacetum 'Robinson's Red'

Robinson's Red Painted Daisy

24-36" tall by 18-24" wide Exposure: sun

Large daisy-like flowers with bright yellow centers and petals ranging from scarlet-red to fuchsia. The flowers sit 24-36" tall on sturdy stems above green ferny foliage. Blooming in late spring and early summer, they make beautiful, long-lasting cut flowers. Prefers well-drained soils. Short lived, Painted Daisy needs to be divided every few years to maintain vigor.

True 1 gallon

Thalictrum 'Black Stocking'

Thalictrum aquilegiifolium 'Black Stocking'

Black Stocking Meadow Rue

48-60" tall x 18-24" wide Exposure: sun to light shade

This statuesque perennial makes a distinguished presence in the back of a border or the edge of a woodland with its black stems and Columbine-like, lacy green foliage. Fluffy bright lavender flowers bloom in early summer. The combination of black stems and frothy flower heads makes for an interesting cut flower. Does best in full sun with moist soils or along the woodland.

True 1 gallon

Thalictrum aquilegiifolium 'Nimbus White'

Nimbus White Meadow Rue

18-28" tall x 16" wide Exposure: sun to light shade

A smaller Meadow Rue, Nimbus White only reaches 28" tall when in flower. Masses of cloud-like white flowers are held on dark stems above the ferny, Columbine-like foliage. The white flowers become lavender pink seed heads, extending the show into late summer. Grows well in full sun to part shade in moist, organic soils with average water needs.

True 1 gallon

Thalictrum 'Nimbus White'

Tradescantia

Spiderwort

Exposure: sun to part shade

Spiderworts are clump-forming herbaceous perennials with arching, grass-like foliage. Prolific bloomers, flowering starts in late spring and continues into late summer. They prefer moist soil in full sun. Cut plants back hard if they start to look tired, they will produce fresh new foliage and will often re-flower.

'Blueberry Sundae' - plum colored buds open to very large, icy blue flowers with a darker, lavender-blue eye; 18-24" tall by 18" wide. Blooms all summer.

'Karminglut' - rosy red flowers; 18-22" tall & wide

'Leonora' - beautiful violet-blue flowers, 16" tall & wide

'Sweet Kate' - brilliant gold foliage, vibrant violet-blue flowers; 12" tall by 15" wide

True 1 gallon

'Blueberry Sundae'

'Karmiglut'

'Sweet Kate

'Leonora'

Tricyrtis formosana 'Autumn Glow'

Autumn Glow Toad-lily

24" tall x 24-30" wide Exposure: part shade

Orchid-like flowers cover the gracefully arching stems of this early fall flowering perennial. Flowers are heavily spotted and reddish-purple in color. Bright green, waxy leaves are edged in brilliant gold.

True 1 gallon

Tricyrtis 'Autumn Glow'

Tricyrtis formosana 'Samurai'

Samurai Toad-lily

12-18" tall x 12-24" wide Exposure: part shade

Samurai is a compact selection with shiny, dark green leaves thinly edged in golden-yellow to cream. Its small, orchid-like, pink-purple flowers with yellow throats are heavily freckled with dark purple, and bloom in early to mid-autumn.

True 1 gallon

Tricyrtis 'Samurai'

Tricyrtis 'Sinonome'

Tricyrtis 'Sinonome' — Sinonome Toad-lily

30" tall x 18-24" wide Exposure: part shade

Orchid-like flowers are heavily spotted white and reddish purple. Bright green, waxy leaves cover the stems from top to bottom. A wonderful plant that should be sited so the interesting flowers can be seen up close. Sinonome is more tolerant of drier conditions than many Toad-lilies and has an exceptionally long bloom duration. In our yard, the plants will get hit with a hard frost before they're finished flowering. Foliage is deer resistant, but they love pruning off the buds in late summer.

True 1 gallon

Verbena 'Lollipop'

Verbena bonariensis 'Lollipop' — Lollipop Vervain

24" tall & wide Exposure: sun

This dwarf Vervain flowers non-stop from early summer to fall. Its lavender colored blooms are coveted by pollinators and are great additions to flower arrangements. To overwinter here in Ohio, our clay soil must be amended to ensure good winter drainage.

True 1 gallon

Vernonia lettermanii 'Iron Butterfly'

Vernonia lettermanii 'Iron Butterfly' — Iron Butterfly Ironweed

24-30" tall & wide Exposure: full sun

This is not the Ironweed that grows in this area, but is a native of Oklahoma and Arkansas. Its fine, long bladed foliage grows densely and forms a shrubby mound up to 3' tall, giving it a similar texture to *Amsonia hubrichtii*. In late summer the plants produce small, bright purple flowers held in umbels that are very attractive to butterflies. Found growing mainly in the rocky flood plain of the Ouchita River in Arkansas, it is tolerant of extreme drought and periodic flooding.

True 1 gallon

Vernonia 'Southern Cross'

Vernonia 'Southern Cross' — Southern Cross Ironweed

30-36" tall & wide Exposure: full sun

This shorter variety of Ironweed is a *V. lettermanii* hybrid with Amsonia-like foliage. It has an upright, vase-shaped habit and long thin leaves. In late summer, the plant is covered in small purple flowers that are a little bigger than *V.* 'Iron Butterfly', but smaller than *V. noveboracensis*.

2 gallon

Veronica 'Blue Skywalker'

Veronica 'Blue Skywalker'

pp# 29,406 — Blue Skywalker Speedwell

28-30" tall x 18-20" wide Exposure: sun

This very upright growing veronica is covered in a profusion of lavender-blue flowers on spikes in mid to late summer. Blue Skywalker will readily rebloom with dead heading and continue its floral show into fall. A Walters Gardens Introduction.

2 gallon

Veronica 'Perfectly Picasso'

pp# 29,720 — Perfectly Picasso Speedwell

20-24" tall & wide — Exposure: sun

Dark green foliage is covered in long spikes of bright pink flowers from mid-June to August, hosting a plethora of hummingbirds, butterflies and other pollinators. Perfectly Picasso readily reblooms with dead heading to continue the floral show into fall. A Walters Gardens introduction.

2 gallon

Veronica 'Perfectly Picasso'

Veronica 'Purple Leia'

pp# 34,278 — Purple Leia Speedwell

28-30" tall x 18-20" wide — Exposure: sun

Purple Leia produces a profusion of rosy purple flowers spikes in mid to late summer. The heavily branched scapes extend the bloom period and the dark green foliage is disease resistant. A Walters Gardens Introduction.

2 gallon

Veronica 'Purple Leia'

Veronica spicata Royal Candles ('Glory')

pp #18,932 — Royal Candles Speedwell

15-18" tall & wide — Exposure: sun to part shade

Spikes of intense blue flowers cover the foliage from spring through summer and sporadically until frost. Compact habit.

True 1 gallon *Spring Only*

Veronica Royal Candles

Veronica 'Very Van Gogh'

pp# 27,428 — Very Van Gogh Speedwell

18-20" tall x 20-24" wide — Exposure: sun to part shade

Rosy purple flowers are produced on heavily branched scapes from mid-summer into late summer. It has strong, upright branches, rich glossy leaves, and a uniform rounded habit, a Walters Gardens introduction.

2 gallon

Veronica 'Very Van Gogh'

FERNS

Athyrium x 'Ghost'

Ghost Fern

18-24" tall x 12-18" wide — Exposure: light-deep shade

New growth emerges a stunning silvery white, fading to gray-green with a subtle silver overlay. Similar to a very pale Japanese Painted Fern but with an upright habit and slower growth rate.

Trade 1 gallon

Athyrium 'Ghost'

Athyrium 'Godzilla'

Athyrium 'Godzilla'

Godzilla Japanese Painted Fern

36" tall x 36-48" wide Exposure: light-deep shade

This giant fern forms a massive clump of arching, silvery fronds, highlighted with green and dark purple stems. Prefers shade and evenly moist soils. Thought to be a sporeling of Painted and Lady Ferns discovered at Plant Delights Nursery. Try combining with giant Hostas, Kirengeshoma, and other large shade masters.

True 1 gallon

Athyrium filix-femina 'Lady in Red'

Athyrium filix-femina var. angustum 'Lady in Red'

Lady in Red Northern Lady Fern

18-24" tall & wide Exposure: light-deep shade

A selection of our native Northern Lady Fern which is found in rich moist woods, thickets, fields, meadows, and ravines throughout northern North America. Lady in Red is slightly smaller than the straight species, with lacy light green fronds that contrast with burgundy-red stems for which it was named.

True 1 gallon

Athyrium felix-femina 'Victoriae'

Athyrium felix-femina 'Victoriae'

Victoria Lady Fern

12-24" tall & wide Exposure: light to deep shade

Bright emerald green fronds with crested leaf tips and crisscrossing pinnae form X's up the frond stem. Beautiful vase-shaped habit. A strong grower that prefers evenly moist soils. Victoria is a lush, dense fern that is hard to adequately describe.

Trade 1 gallon

Athyrium niponicum 'Regal Red'

Athyrium niponicum 'Regal Red'

Regal Red Japanese Painted Fern

12-18" tall by 18-24" wide Exposure: light to deep shade

Loose arching mounds of silvery green fronds are heavily tinted with pinks and mahogany that provide a striking contrast to its rich red stems. An excellent grower for part to full shade and evenly moist soils. Great for brightening up a dark area in the shade garden and blending with almost anything. One of the most colorful and easy to grow hardy ferns.

True 1 gallon

Dryopteris affinis 'Cristata'

Dryopteris affinis 'Cristata'

The King Male Fern

36-48" tall x 36" wide Exposure: light to deep shade

The King Male Fern makes a stunning specimen in the shade garden. First introduced to England gardens during the Victorian era. It forms an arching, vase-shaped clump of medium green fronds. These fronds are crested at the tips adding even more interest. Trim off old fronds in the spring.

True 1 gallon

Matteuccia struthiopteris — Ostrich Fern

36-48" tall x 36" wide Exposure: sun-shade

Huge plume-like fronds arch from a central crown and will produce large colonies over time. This fern will tolerate quite a bit of sun given adequate water, and quite a bit of drought given adequate shade. A very vigorous grower when properly sited.

True 1 gallon

Matteuccia struthiopteris

Polystichum polyblepharum — Tassel Fern

18-24" tall & wide Exposure: part shade-shade

A semi-evergreen fern native to Japan and southern Korea, featuring shiny, dark green fronds that grow in an outward-spreading, vase-shaped clump. The tips of the newly emerging fronds flip backwards to form tassels hence the common name. The tassels disappear as fronds flatten with maturity.

Trade 1 gallon

Polystichum polyblepharum

GRASSES

Andropogon gerardii 'Blackhawks' — Blackhawks Big Bluestem

pp# 27,949

4-5' tall x 2' wide Exposure: sun

This long-lived grass was found as a seedling of Red October. It forms a robust, upright clump of dark green foliage. As the nights start to cool in late August, the foliage undergoes a stunning transformation, turning purple and deepening to almost black by late September. In late summer, flowering stems rise above the foliage, bearing unique purplish, 3-part, finger-like flower clusters that can be up to 4" long. These clusters bear a striking resemblance to turkey feet, resulting in another common name of turkeyfoot grass. Big Bluestem was once the dominant member of the tall-grass prairie and has adapted easily to a wide range of conditions, provided it receives full sun. It serves multiple purposes, including acting as a specimen plant, providing screening, naturalizing landscapes, restoring prairies, and offering nesting materials for birds and mammals.

True 1 gallon

Andropogon 'Blackhawks' (early fall)

Calamagrostis x acutiflora 'Karl Foerster' — Karl Foerster Feather Reed Grass

3-4' tall x 1.5-2' wide Exposure: sun-part shade

Perennial of the year for 2001, Karl Foerster is easy to grow with a strictly upright, clumping habit. Greenish, loose clustered flowers appear in June, quickly followed by tight, upright, warm brown spikes of seed. It will grow 2-3' tall in dry sites while attaining 4-5' in richer soil. Very tough.

True 1 gallon

Calamagrostis 'Karl Foerster'

Festuca Beyond Blue

Festuca glauca Beyond Blue ('Casca11')

pp# 23,307 — Beyond Blue Fescue

9-12" tall x 12-18" wide — Exposure: sun-afternoon shade

Unlike some fescues, Beyond Blue retains its striking blue color over the summer when other varieties look faded. It's a low maintenance choice, frequently used for mass plantings or as a groundcover. Fescues prefer average to dry garden soils and full sun to light shade.

Trade 1 gallon

Festuca 'Blue Whiskers'

Festuca glauca 'Blue Whiskers'

pp# 29,200 — Blue Whiskers Fescue

10-12" tall x 24-28" wide — Exposure: sun-afternoon shade

Blue Whiskers was selected for its larger size and fine textured, long, silver-blue leaves. It's a low maintenance choice, frequently used for mass plantings or as a groundcover. Fescues prefer average to dry garden soils and full sun to light shade.

Trade 1 gallon

Pennisetum 'Hameln'

Pennisetum alopecuroides 'Hameln' — Dwarf Fountian Grass

24-36" tall & wide — Exposure: sun

A great dwarf grass for groups and massing. Flowers in summer, producing abundant bottlebrush-like seed heads with a soft, arching texture.

True 1 gallon

Pennisetum 'Lemon Squeeze'

Pennisetum alopecuroides 'Lemon Squeeze'

pp# 34,634 — Lemon Squeeze Fountain Grass

30-36" tall x 24-30" wide — Exposure: sun

Bright gold foliage shines in the spring, matures to chartreuse by summer. In early fall, large fluffy, copper colored seed-heads dance above the foliage. Excellent choice for year round interest for patio or deck. Great for mass planting and low screens. Prefers well drained soils, especially in winter. Trim back old foliage in early spring.

True 1 gallon

Pennisetum 'Karley Rose'

Pennisetum orientale 'Karley Rose' — Karley Rose Fountain Grass

2-4' tall x 2-3' wide — Exposure: sun-light shade

This selection produces intense, smoky rose-purple flowers starting in midsummer and continuing until fall. The colorful plumes are held above the glaucous, blue-green, horizontally layered foliage for a soft, but colorful display. Good drainage, especially overwinter, is needed for best performance. Selected and introduced by David Skwiot, Sunny Border Nursery, CT.

True 1 gallon

Schizachyrium scoparium 'Chameleon'

pp# 31,339

Chameleon Little Bluestem

2-4' tall x 1.5-2' wide Exposure: sun-light shade

This seedling of The Blues makes a stunning focal point in the garden with its bright white and green striped foliage. Beginning in early fall, as the weather cools, the foliage and stems become a riotous, ever changing blend of green-gray, pink, red, and light purple tones. Slow growing, prefers slightly dry, well-drained soils.

You are cordially invited to stop in at your convenience. We will gladly assist you with your plant selection needs, or you may peruse the nursery at your leisure. We are located at 7520 Home Rd., west of the Scioto River, between Concord Rd. and Jerome Rd. in southwestern Delaware County.

Hours

March – **November**
Monday – Friday *8:00 am – 5:00 pm*
Saturday *Closed*
April **–** July: We are probably working but call ahead to be sure. Arrangements can be made for someone to be at the nursery.
Sunday *Closed*

December – **March**
Closed for the winter but please call if you have any questions. Again, arrangements can be made for someone to be at the nursery.
